

Panopto: Edit videos

Last Modified on 08/11/2022 9:59 am EDT

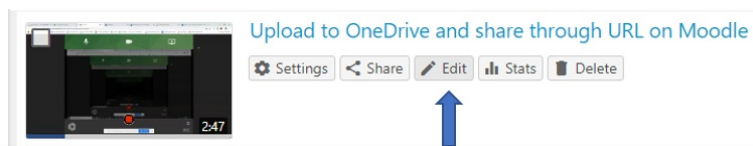

Once you've [recorded](#) and [uploaded](#) a video on Panopto, you have the ability to edit your video track and apply the changes to the video. This document offers a basic introduction to editing.

Learn more:

- For more extensive video editing documentation in Panopto, please see [How to edit a video](#) and [How to trim a video in the editor](#) on the [Panopto Support](#) site.
- To find more details about captioning, please look at [Panopto: Captions](#) and [read more about automatic captioning for Panopto](#).

How to edit

1. Underneath your video, click the **Edit** button to bring up the video editor.

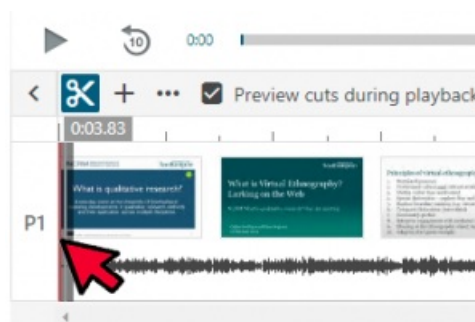

2. Once the video editor is open, you will see the timeline at the bottom of the screen with a track for each video stream. Typically, this will include the primary (P1) and secondary (S1) streams.

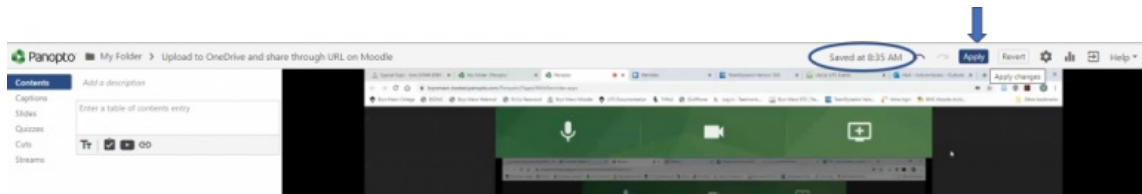

3. When you click the **Play** icon ► the video will begin to play and the red vertical bar will move along the timeline to indicate which section of the video is playing.

4. Use the Cut icon ✂ to trim or cut the video.

5. Panopto will automatically save any changes you make to the video, as indicated by the time

stamp in the top right corner. However, it is essential that you click the blue **Apply** icon when you are finished editing in order for your changes to take effect.

Questions?

If you have any additional questions or problems, don't hesitate to reach out to the **Help Desk!**
