Panopto: Create video quizzes

Last Modified on 08/13/2025 6:16 pm EDT

This article explains how to **embed quiz questions in videos stored on Panopto** to create video quizzes. **Give people a share link to take the video quiz** in Panopto or **add the video quiz to a Moodle course as a Panopto video assignment**. You can always view video quiz results in Panopto; if added to a Moodle course you can also optionally sync quiz grades to the Moodle gradebook.

> **Before you start**, you will need:
>
> - **A Panopto account.** Current Bryn Mawr students, faculty and staff and Haverford students enrolled in Bryn Mawr courses can get access through Bryn Mawr's license; see Panopto: Get and log into your account.
> - **Creator permission** for a Panopto video to **create** a video quiz; **Viewer** permission that video in order to **take** it. See Panopto: Sharing recordings

Add a quiz to a Panopto recording

A "quiz" in this case is **a set of questions that appear at a certain point in a recording**. If you want **questions to appear at multiple points**, you need to create a quiz for each one. (See also Panopto's How to add a Quiz to a video for a video walkthrough.)

Share a quiz and view results

If you are creating this video quiz for a course, move it to your Panopto course folder to share it with your students. You can also create a video assignment activity for it to place it within the course page and (optionally) add the quiz grade to your Moodle gradebook. See Moodle: Add audio and video using Panopto,

Otherwise, **use Panopto share settings and/or links** to share it with people taking the quiz. See Panopto: Sharing recordings. They will need to be able to log into Bryn Mawr's Panopto site; see Panopto: Get and log into your account for information about who is eligible for a Panopto account and how they can get access.

To view quiz results in Panopto:

1. Log into Panopto.
2. Navigate to your video quiz, hover over it and click ⚙ (Settings).

3. Click **Quiz Results**.
4. Select **Download** to export the results as a CSV file (optional).
