

# Drupal - Basic: Flex Basic WYSIWYG

Last Modified on 05/07/2025 11:44 am EDT

## Flexible Content Items

In our [first article about Flexible Content Items](#), we discussed a general overview of what Flexible Content Items are, how to use them and where to find them.

In this article, we will talk exclusively about the WYSIWYG (What You See Is What You Get) editor that you can add to just about any content type by choosing the "Add WYSIWYG" option under the Flexible Content area in the edit screen.

This article covers basic operations within the WYSIWYG.

## WYSIWYG

A typical WYSIWYG (What You See Is What You Get) editor that gives you the ability to

- Embed images
- Embed videos
- Embed tables
- Blockquotes
- Make links
- Make primary buttons and secondary buttons out of links
- Link to content on the site by title instead of URL.
- You can also upload files there (there will be a pop-up window that has Help Text near the Upload File button that says "Use the button above to upload a document in a new tab. Once you add the document, close that tab and return to this screen and search for your document in the URL field.")
- And all the other things a typical WYSIWYG can do

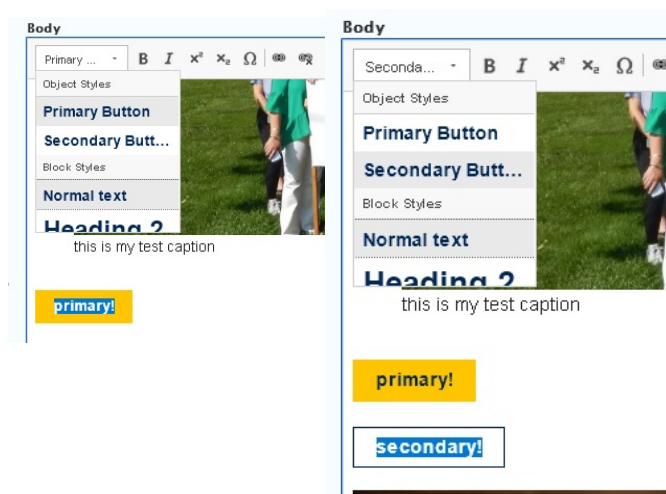

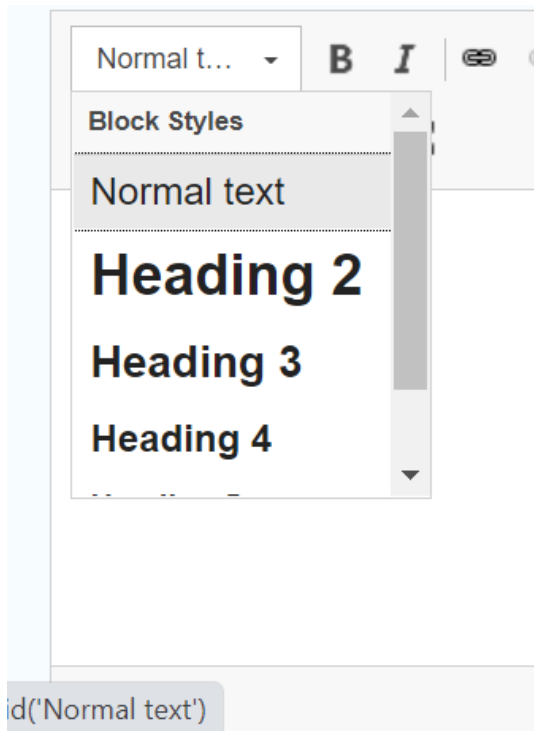

## WYSIWYG toolbar

### Read about basic text editor options.

This section discusses basic formatting and the WYSIWYG toolbar buttons.

Hover over a button to see a description of the button, or review the options below.

Click the down arrow on the Formatting to see the list of available options. Please note that there are additional formatting options when text has been made into a link. Paragraph formatting options allow you to set normal text or headings. Links can be formatted for Primary or Secondary buttons. Other font and style options are set by the College template and cannot be changed here.

Left to right: Bold, Italic

Left to right: Link, Unlink

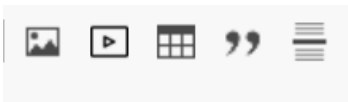

Left to right: Insert/Remove Bulleted List, Insert/Remove Numbered List

Left to right: Image, Video, Table, Blockquote, Insert Horizontal Line.

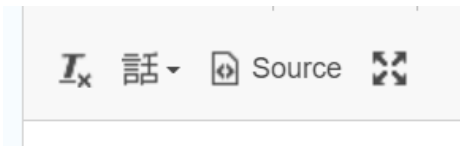

Note: Tables should be used only for tabular data, not for layout purposes. See the [Accessibility Guide](#) for details.

Left to right: Align left, Center, Align Right, Justify

Left to right: Remove Format, Set Language, Source, Maximize

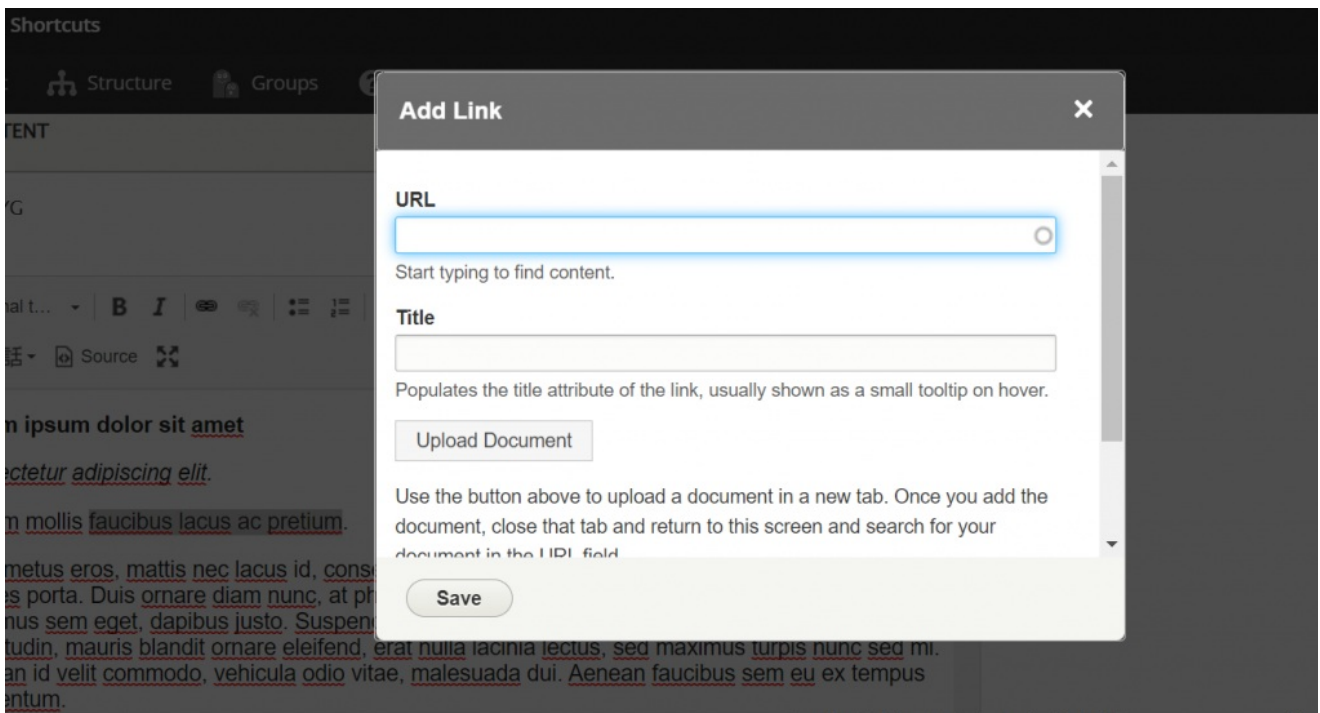

[Back to Top ^](#)

## WYSIWYG Links

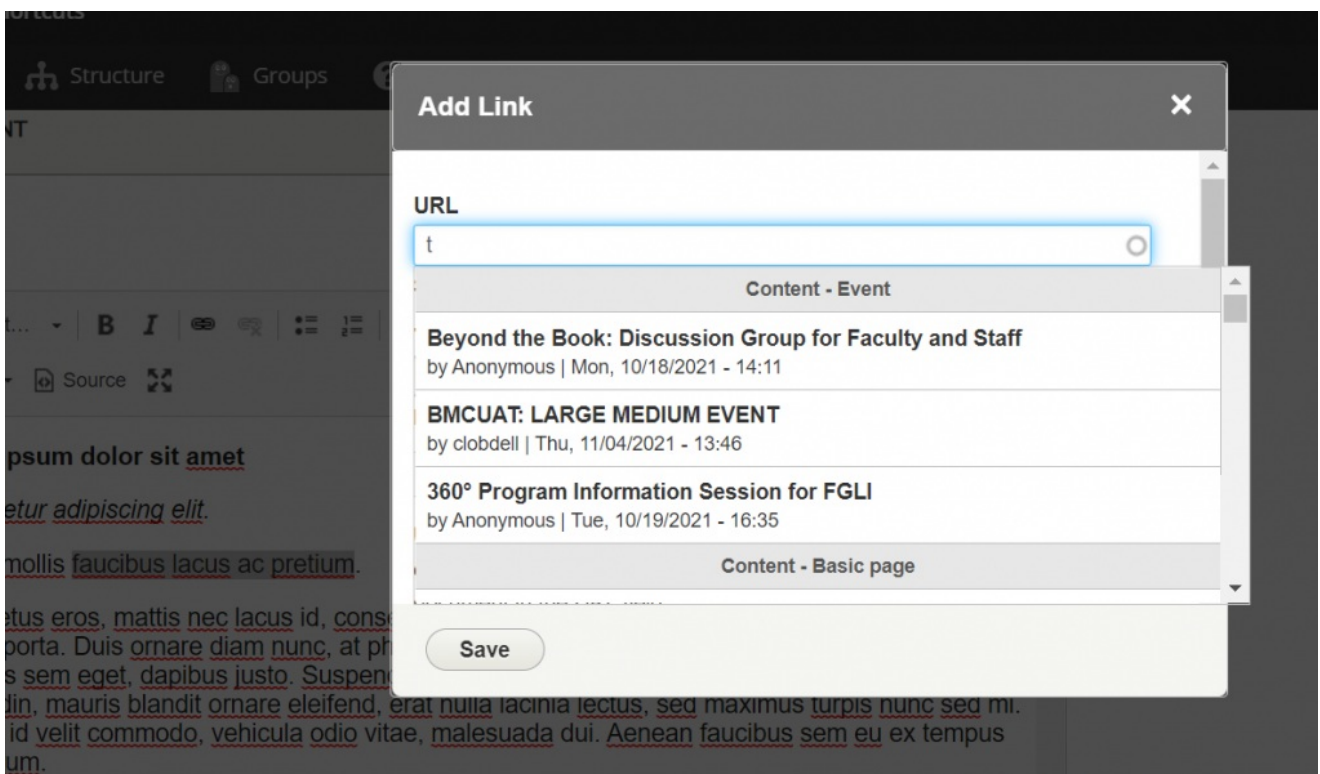

### Learn about inserting links.

This section discusses adding links, adding link styles like buttons as well as linking emails and removing links.

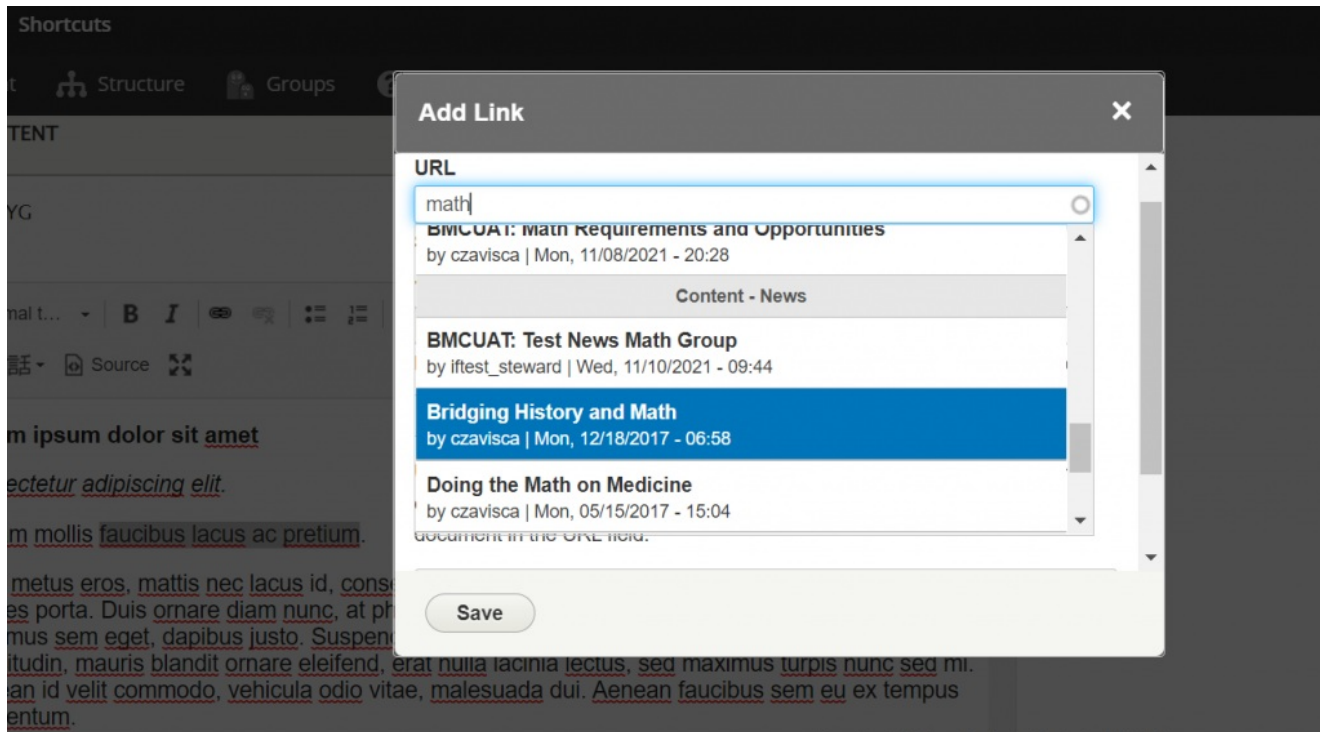

### Adding a link:

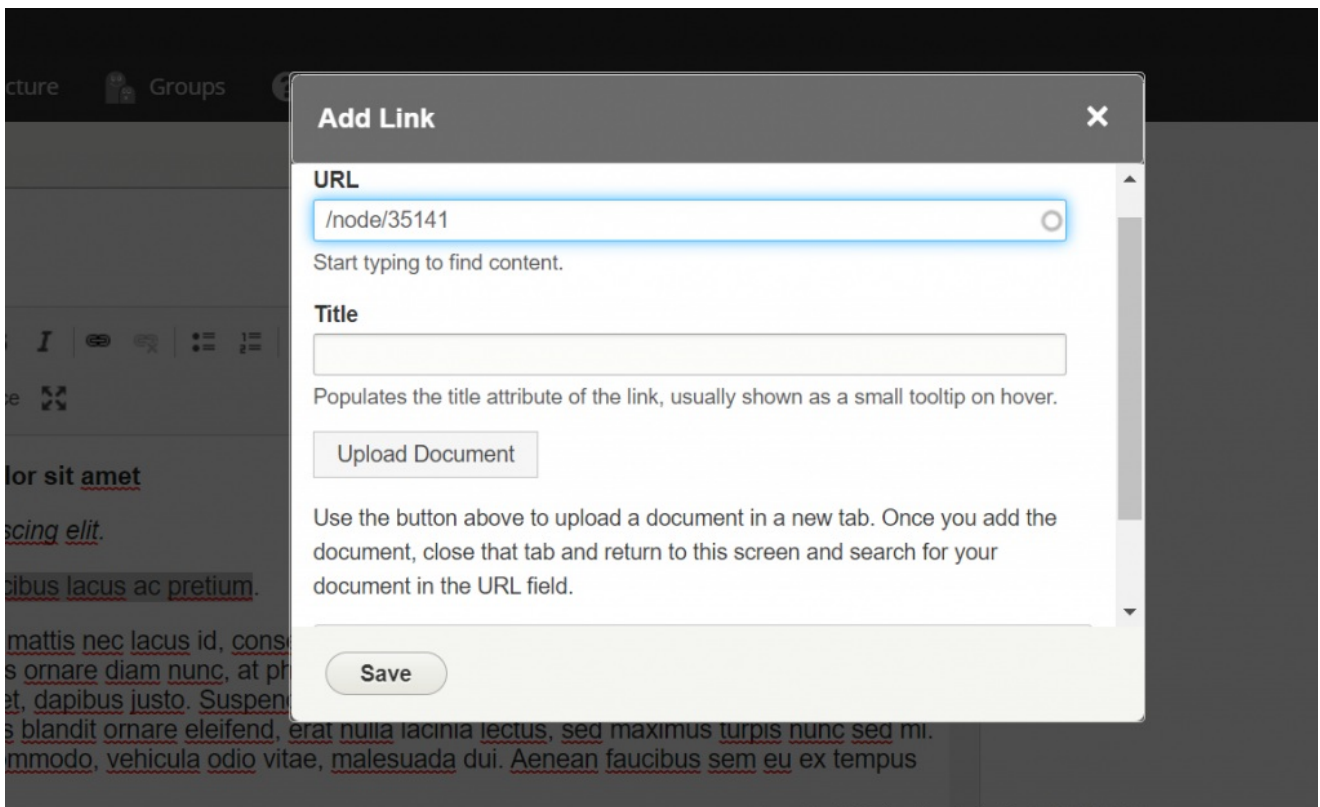

Searching for content by title. For internal [www.brynmawr.edu](http://www.brynmawr.edu) links, the title search is the recommended and best approach

When you select the title you want

Drupal will put in the Drupal-specific relative URL so Drupal can find it for the user later when they click on the link:

Once you've made your selection, click the save in the popup window to return to the normal WYSIWYG.

If you need your link to be outside of our website, you can also use the Link Icon to achieve this.

Simply type your text and highlight it. Then click the Link icon.

This will open the Linkit Popup window where you can type the full address of the external URL, please note that you will need to put in a full external URL into the link field but it must begin with either http:// or https://

Once you've typed in the full external URL, click the save button in the popup window to return to the normal WYSIWYG.

## Links as Buttons

Now you can highlight the text link and get to apply one of two styles to it, Primary Button or Secondary Button. You could also just let it be link text, if it is just part of a paragraph.

## Linking to a specific part of a page:

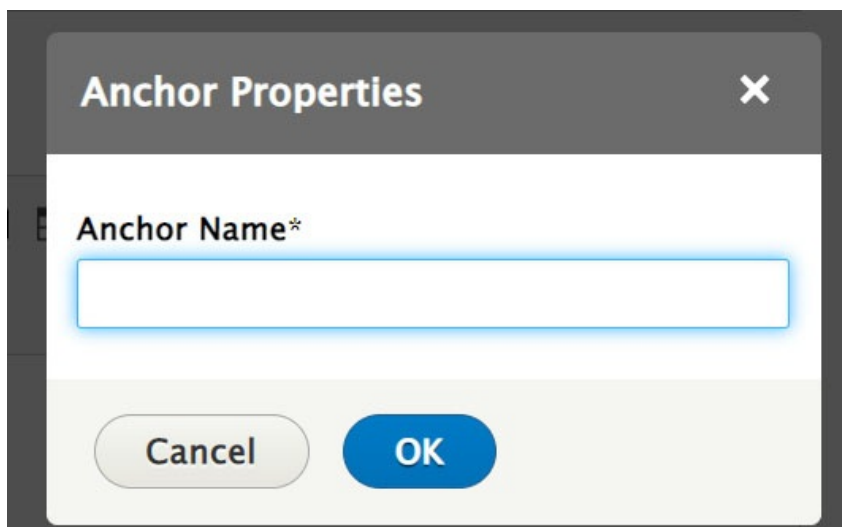

These links are called “anchor links.”

One last note on links is making an anchor link. In order to do so you would need to set the anchor name and then link to it. There are two ways of doing it, one, using the Anchor Link Flag icon, and one by manually placing the anchor in the code.

To add an anchor link to a page using the Flag icon, click the flag icon.

Choose a name for your anchor (example: “target”).

A screenshot of a dialog box titled 'Anchor Properties' with a close button (X) in the top right corner. Inside the dialog, there is a label 'Anchor Name\*' followed by a text input field. The input field is currently empty and has a blue border. At the bottom of the dialog, there are two buttons: 'Cancel' and 'OK'.

The address of your anchor will then be “#AnchorName”. For example, “#target”.

**Add Link** [X]

**URL**

#target

No results

**#target**  
Linkit could not find any suggestions. This URL will be used as is.

Populates the title attribute of the link, usually shown as a small tooltip on hover.

Upload Document

Use the button above to upload a document in a new tab. Once you add the document, close that tab and return to this screen and search for your document in the URL field.

Save

Drupal will tell you that it couldn't find any suggestions for that text so it will use it as is, which is exactly what we want.

Press Save in the pop-up to return to the WYSIWYG.

## Remove links

Remove links by highlighting them and clicking the chain link with x icon.

## Linking to documents

### Linking to an email address:

Simply type the email address in the WYSIWYG. Drupal will convert the email address to a link upon save.

[Back to Top ^](#)

## WYSIWYG Images and Videos

### Learn to add images and videos in the WYSIWYG

This section discusses adding image and videos within the WYSIWYG editor.

The other things that are improved or different are how you can embed an image or video, and also how a blockquote looks on the actual page. To see how to [upload new Videos](#) and how to [upload new Images](#), please read our Media article.

### Add an image

To **add an image**, simply place your cursor where you want the image to appear and then click the image icon in the toolbar. This will give you a pop-up to select a new image for upload or select one that is already in the Media Library. In this example we are using one that is already in the Media Library.

Select media item to embed

[Browse Library](#) [Upload](#)

Name contains

Alt text contains

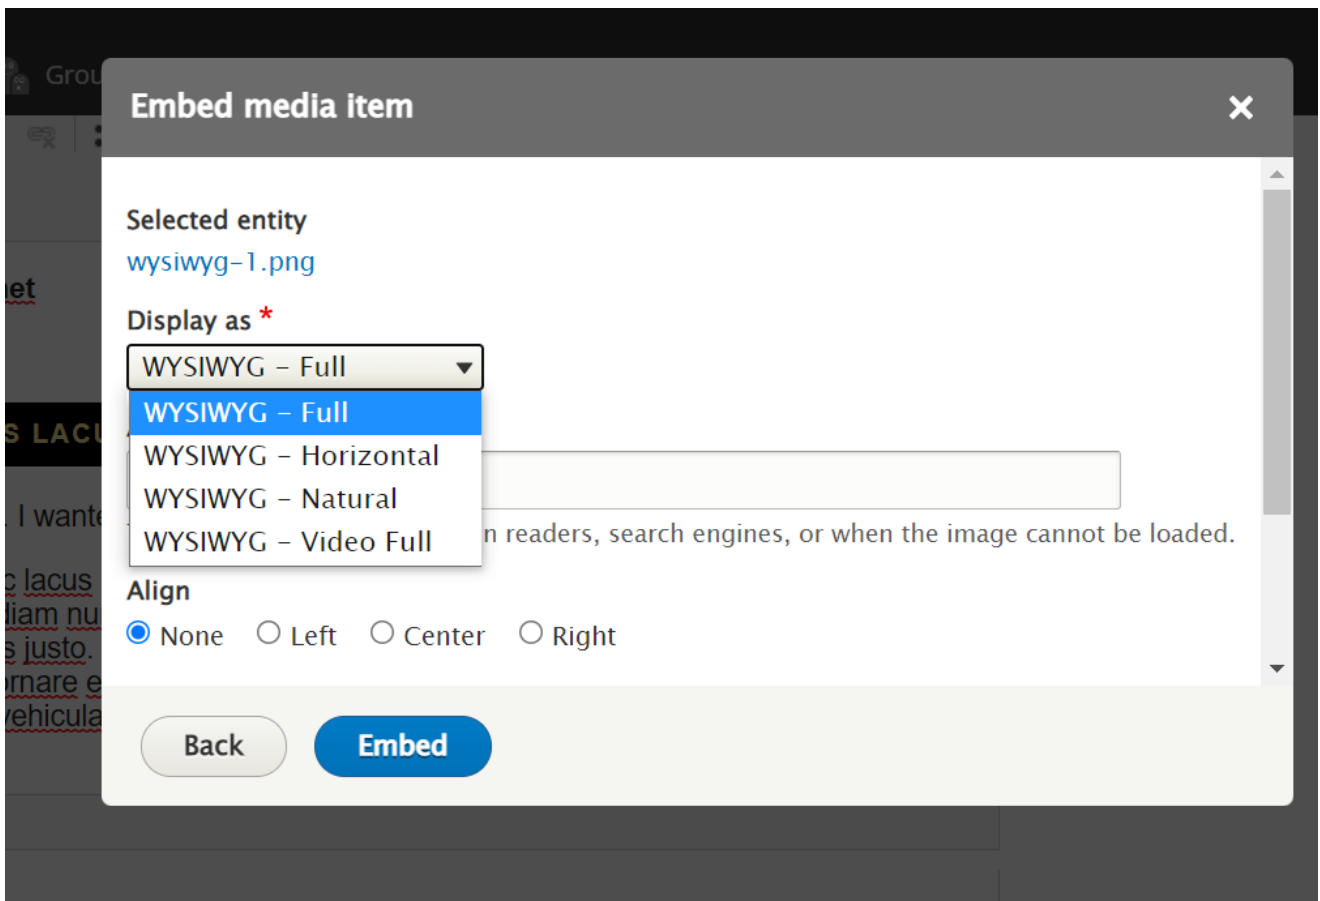

Min width

Min height

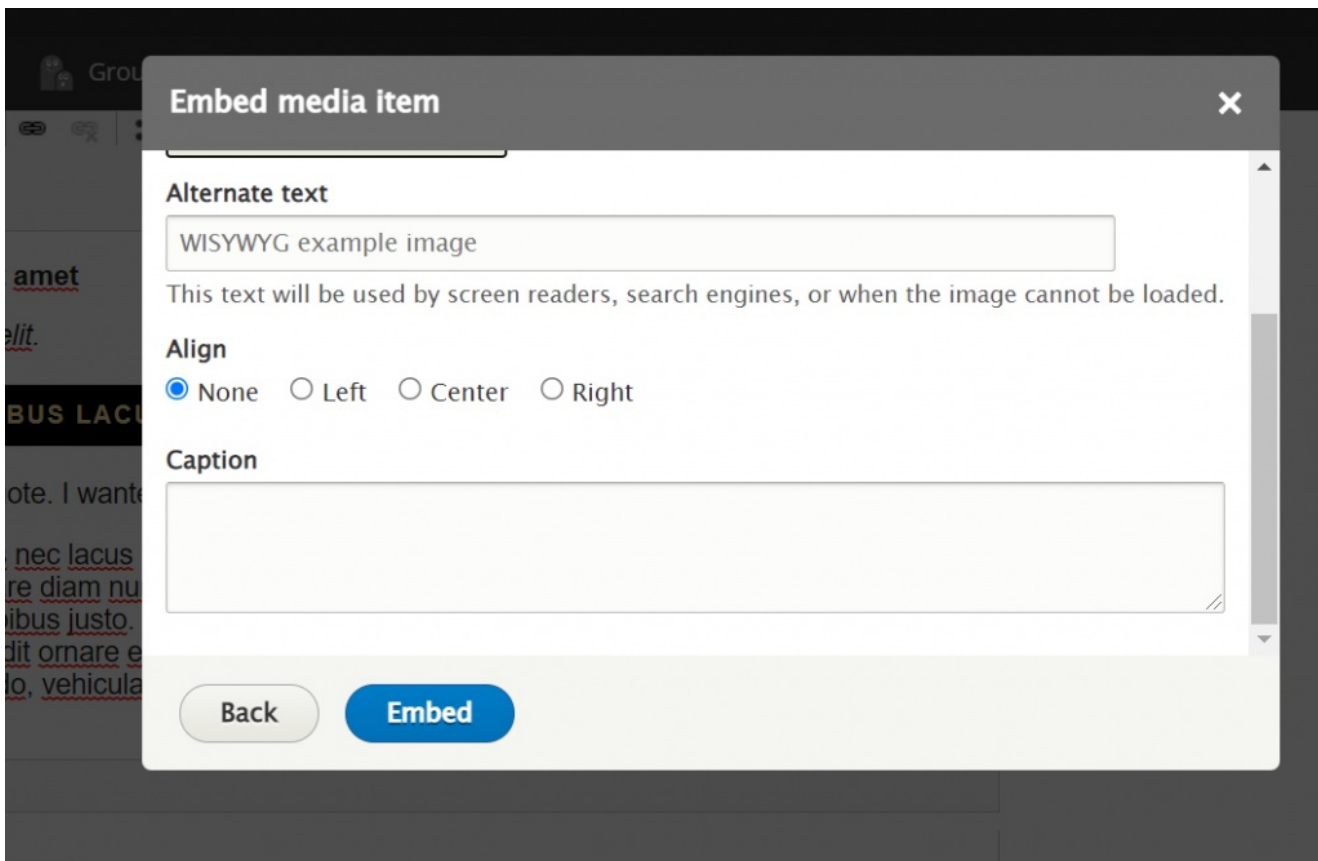

[Apply](#)

IMAGE	NAME	ALT TEXT	ADDED/UPDATED

You will be able to select the style the image receives as it is appearing in the WYSIWYG area of the page. You can have it float right or left or take up the width of the WYSIWYG area.

You can scroll down in this popup window to create a caption or just have the image appear on its own.

When you are satisfied with all the selections you have made in the popup window to embed the media item, you can press the Embed button

If you realized you needed to edit the image, you can right-click on it within the WYSIWYG and select Edit Image. Double clicking on the media object also brings up the edit screen. This will bring you back to the Embed Media Item popup window so you can amend your selections.

[Back to Top ^](#)

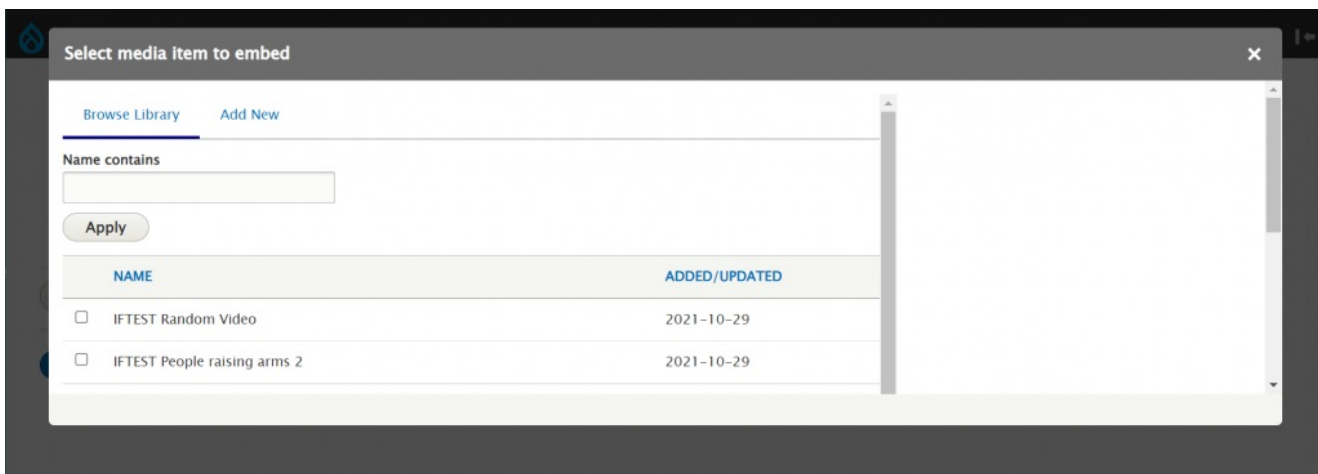

## Embed a Video (YouTube or Vimeo)

This feature is limited to only YouTube or Vimeo videos. If you wish to embed a Panapto video, please see our [Embed Other Content Items](#) instructions.

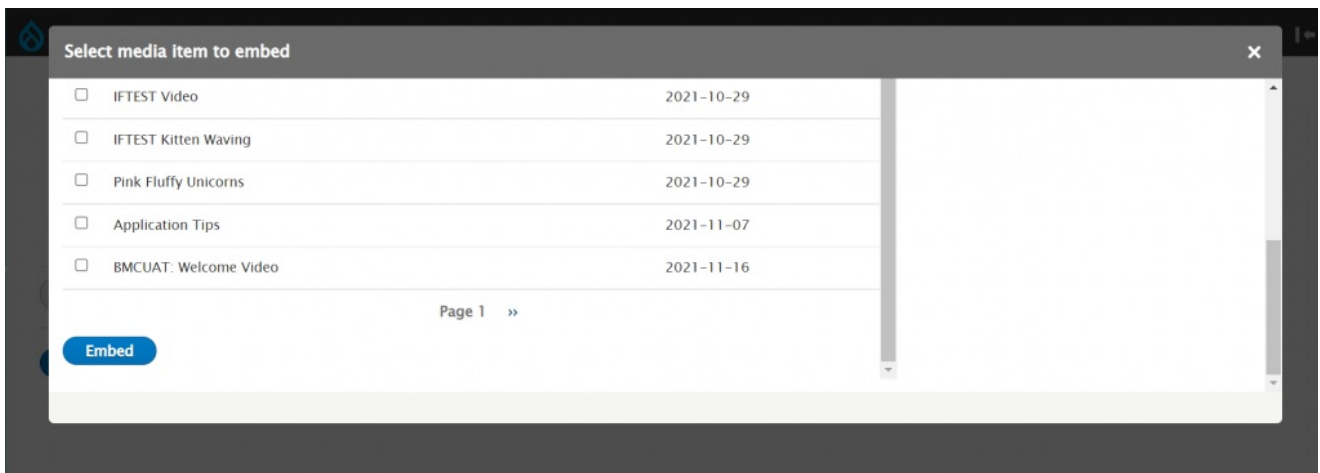

**To embed a video** in the WYSIWYG, you would place your cursor where you want the video to appear and then click the video icon in the toolbar

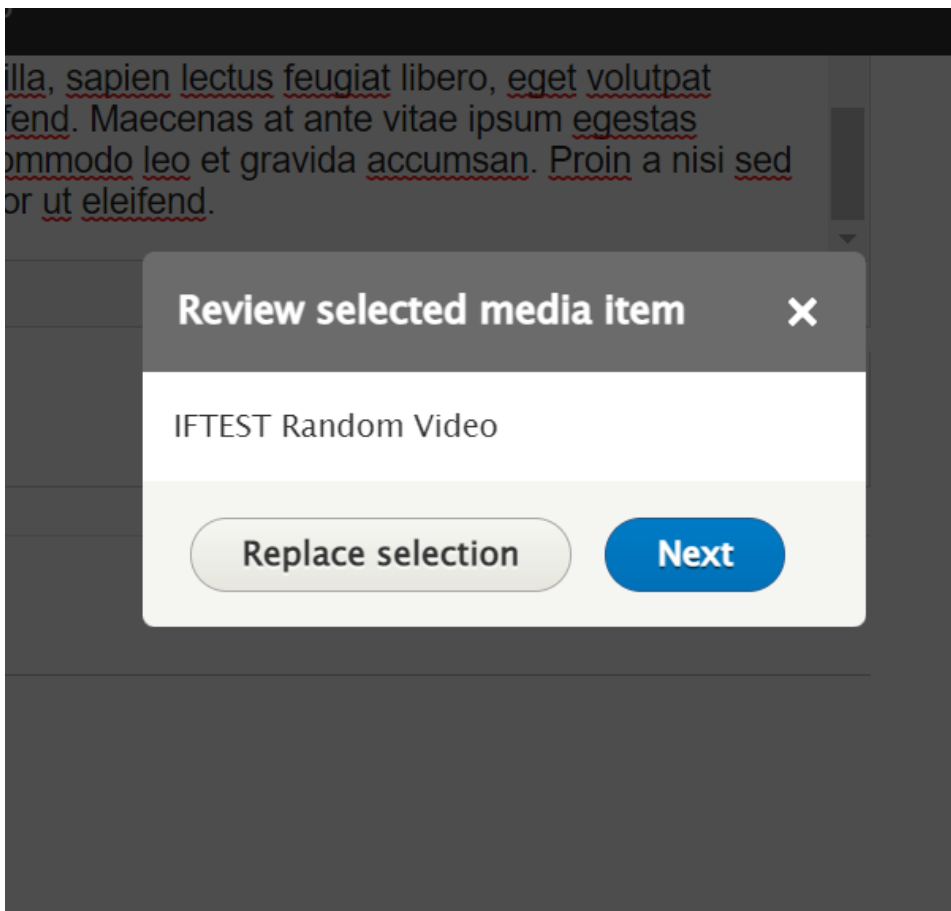

This will give you a popup to either select a video in the Media Library or Add a new one

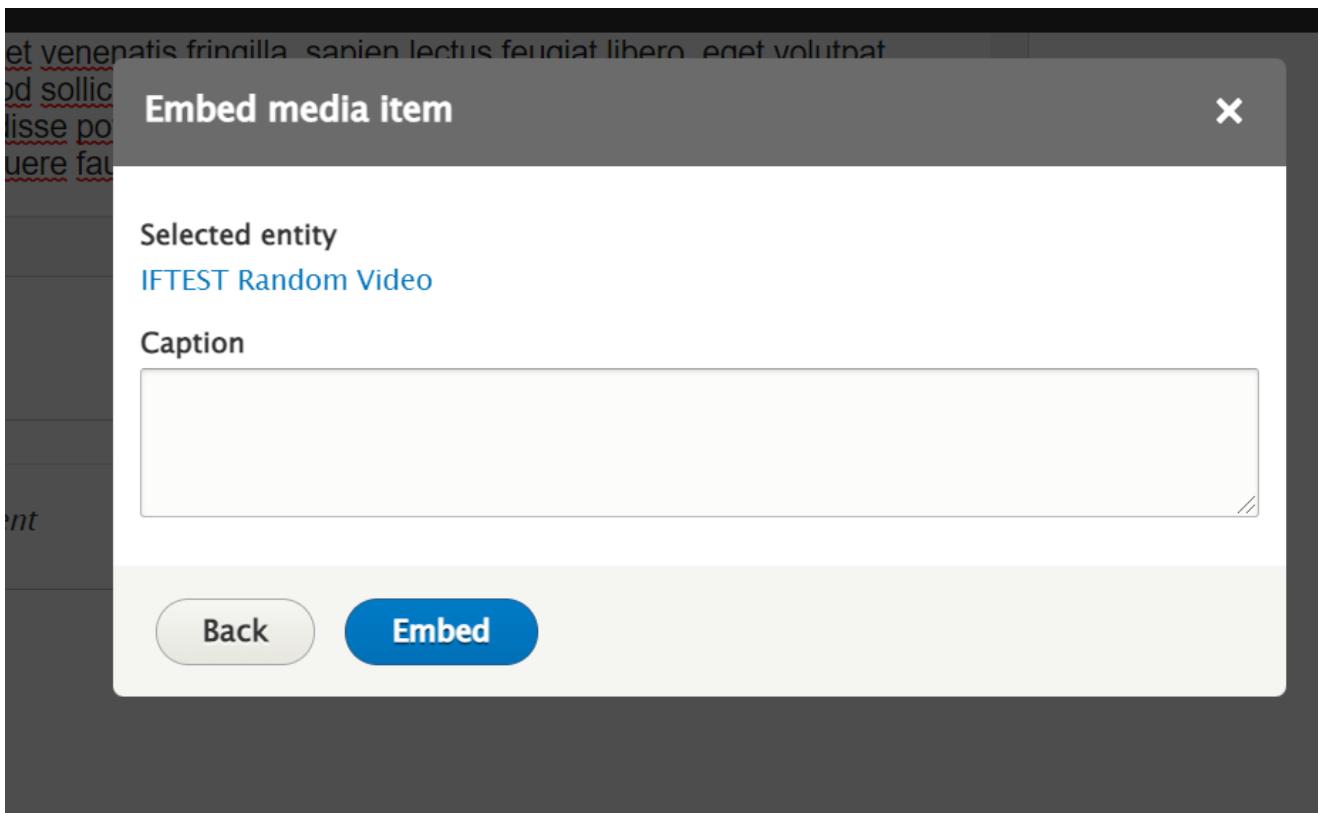

In this example I'm just picking one in the Media Library. Make sure to scroll down in the popup window and then click Embed button.

Once you click Embed, Drupal will ask you to make sure you picked the correct one. If you are satisfied with your selection, Click Next. This will give you a popup to add a caption to the video, if you'd like. Whether you add a caption or not, you will need to click the Embed button to complete the process of embedding the video

[Back to Top ^](#)

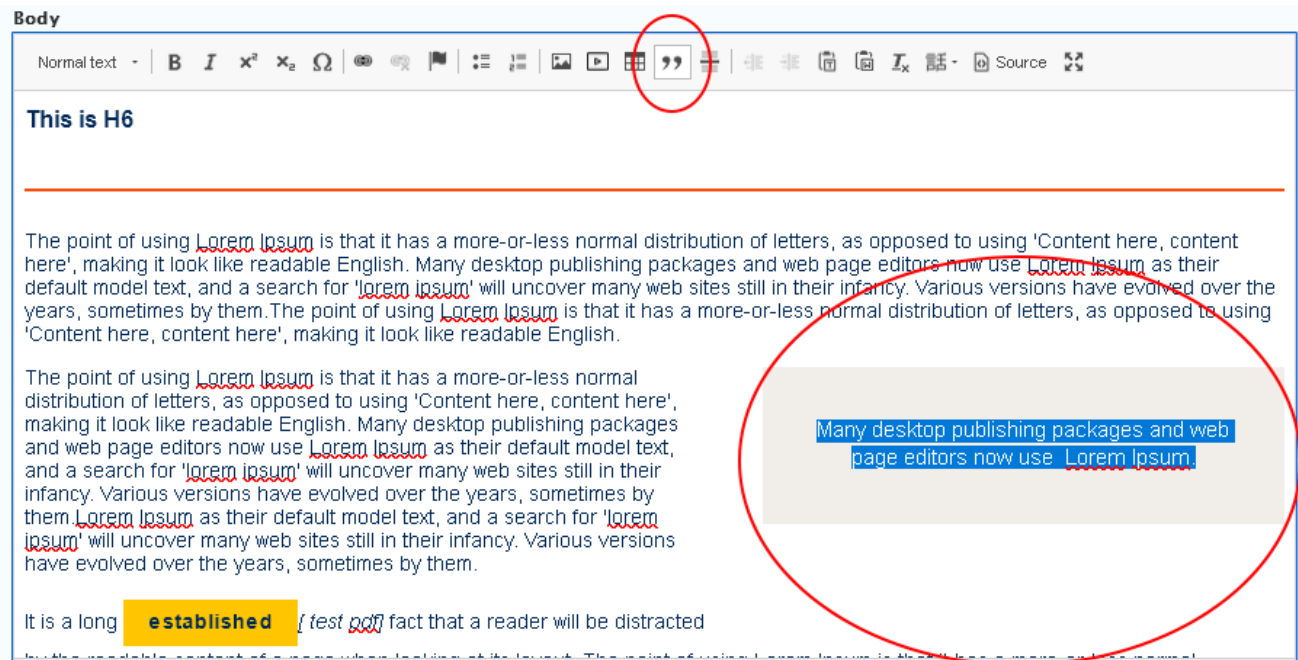

## WYSIWYG Blockquote

Learn how to add a blockquote.

Please note that blockquotes display in a very different way than you might expect. Read on to learn what it looks like on the page

This Section discusses how to add a blockquote within the WYSIWYG and how it displays

To add a blockquote, simply type your text then highlight it and select the quote-marks in the toolbar. Once you click the quote icon in the toolbar, the blockquote will be styled in a grey box to the right.

As you can see, when I save my page and look at it, the blockquote appears as it did in the editor, in a grey box on the right side:

look, a video.

## What is Lorem Ipsum?

**Lorem Ipsum** is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Why do we use Lorem Ipsum?

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use

Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).

This is how you make your anchor [#akTestAnchor], by putting cursor BEFORE this word and adding anchor, not highlighting word to add anchor.  
This is a **blockquote**.

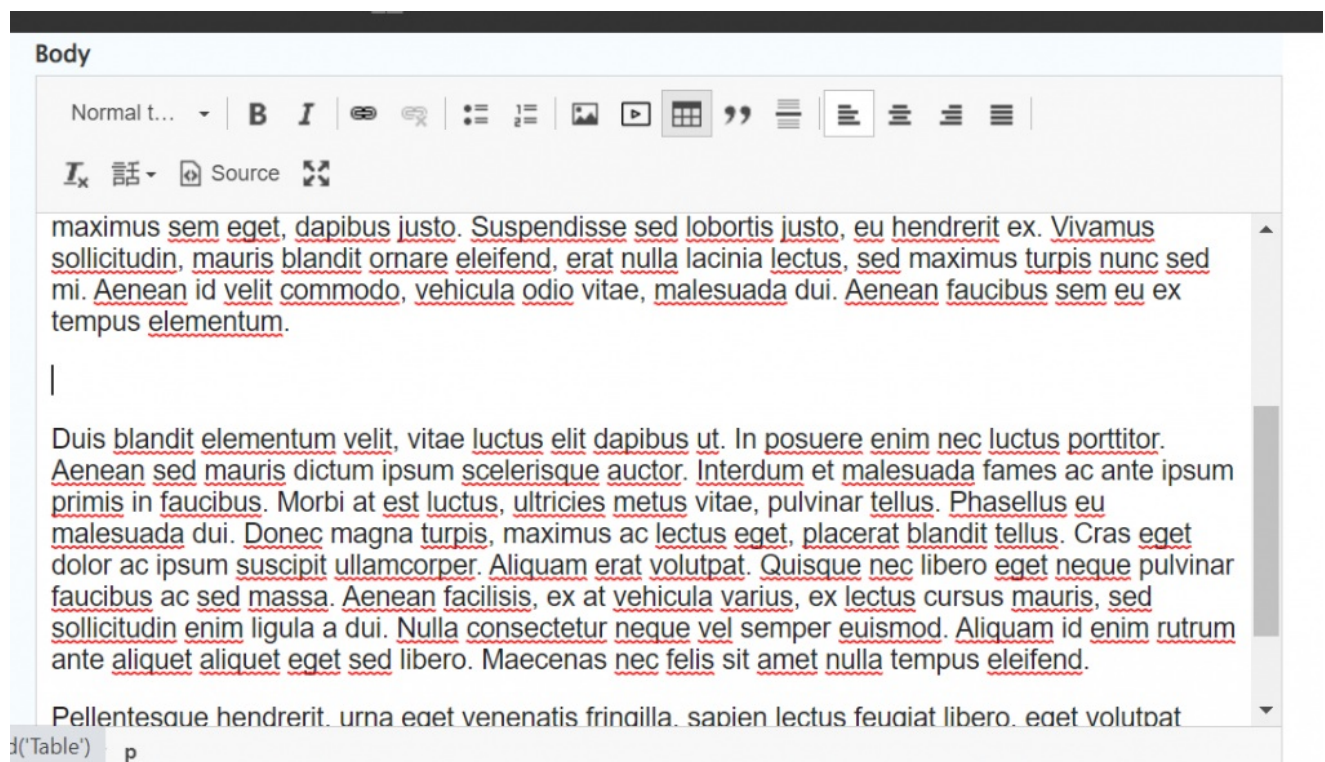

[Back to Top ^](#)

# WYSIWYG Tables

## Learn how to create, edit, and delete tables

This section discusses how to add, edit, delete tables and how insert-from-Word or insert-from-Excel.

You can also create a table in the WYSIWYG by putting your cursor where you want the table to be inserted and pressing the table icon in the WYSIWYG dashboard:

Once clicked, you will get a Table Properties popup window where you can tell it how many rows and columns you want, as well as if there should be table headers, row headers, a caption or summary

**Accessibility Tip:** Tables should always have at least one header (row or column) so people with screen readers can understand the data you are presenting.

## Horizontal Rule

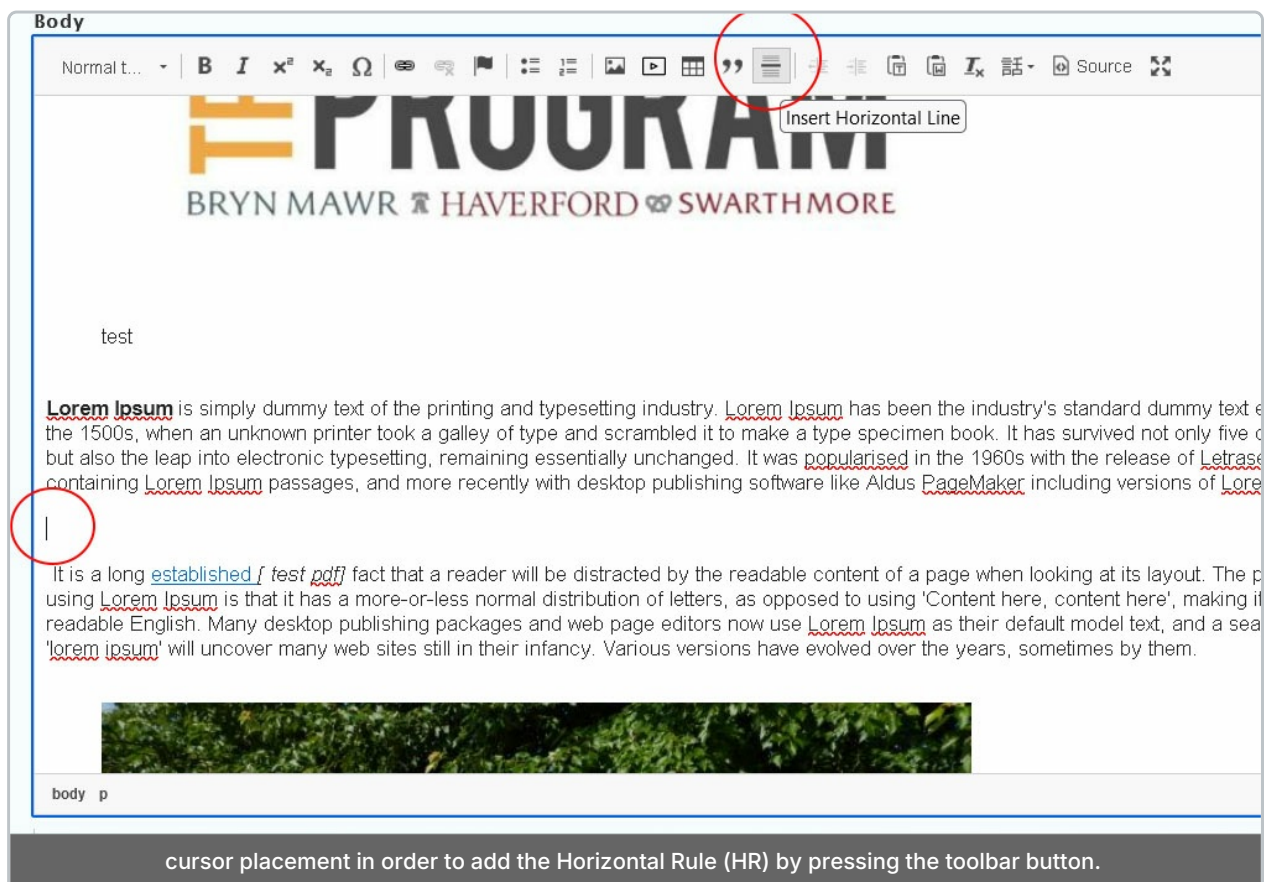

The `<hr>` element defines a thematic break in an HTML page (e.g. a shift of topic) and is most often displayed as a horizontal rule that is used to separate content (or define a change) in an HTML page.

We now have the ability to make our Horizontal Rule in the WYSIWYG get the branded color of our website.

Follow these simple instructions to make your Horizontal Rule go from a thin black line to a thicker, more colorful one with more space before and after it to help define it better.

TO SELECT the HR for styling:

1. **add a new Horizontal Rule (or HR) to your WYSIWYG content by putting your cursor at the end of the line of text, hitting the enter key and then pressing the Horizontal Rule button in the toolbar.**

2. **put your cursor at the beginning of the line of text immediately following the HR**

+

Lorem ipsum  is simply dummy text of the printing and typesetting industry.  Lorem ipsum  has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing  Lorem ipsum  passages, and more recently with desktop publishing software like Aldus  PageMaker  including versions of  Lorem ipsum .

This is H6

---

It is a long **established** [ test pdf] fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more or less normal

Plain and Branded Horizontal Rule (HR) element

## More Flex Articles

Please see the following Articles for how to use the following Flexible Content Items.
