## Adding Video in Drupal

Adding a YouTube or Vimeo video can be done by embedding directly in the WYSIWYG Editor by following the instructions below.

Adding a Panopto video requires you to use an Embed Flexible Content item. Read more about the Embed item in our [FLEX: Basic 2](#) article.

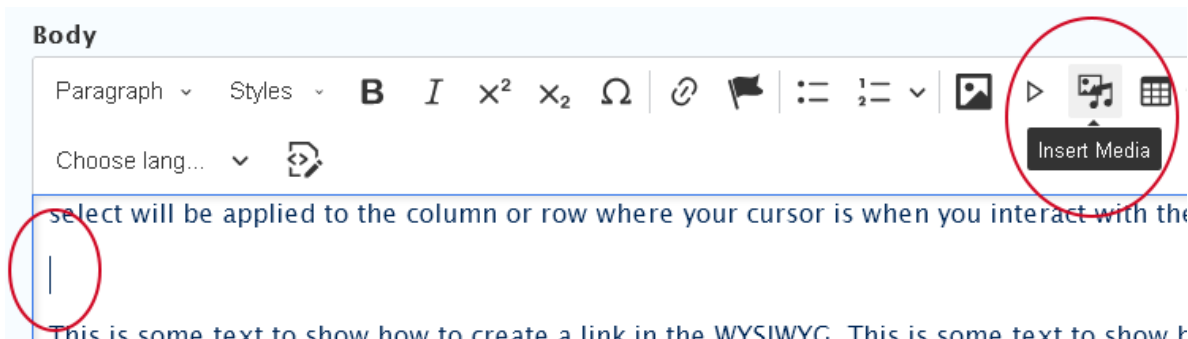

## Embed a Video (YouTube or Vimeo)

This feature is limited to only YouTube or Vimeo videos.

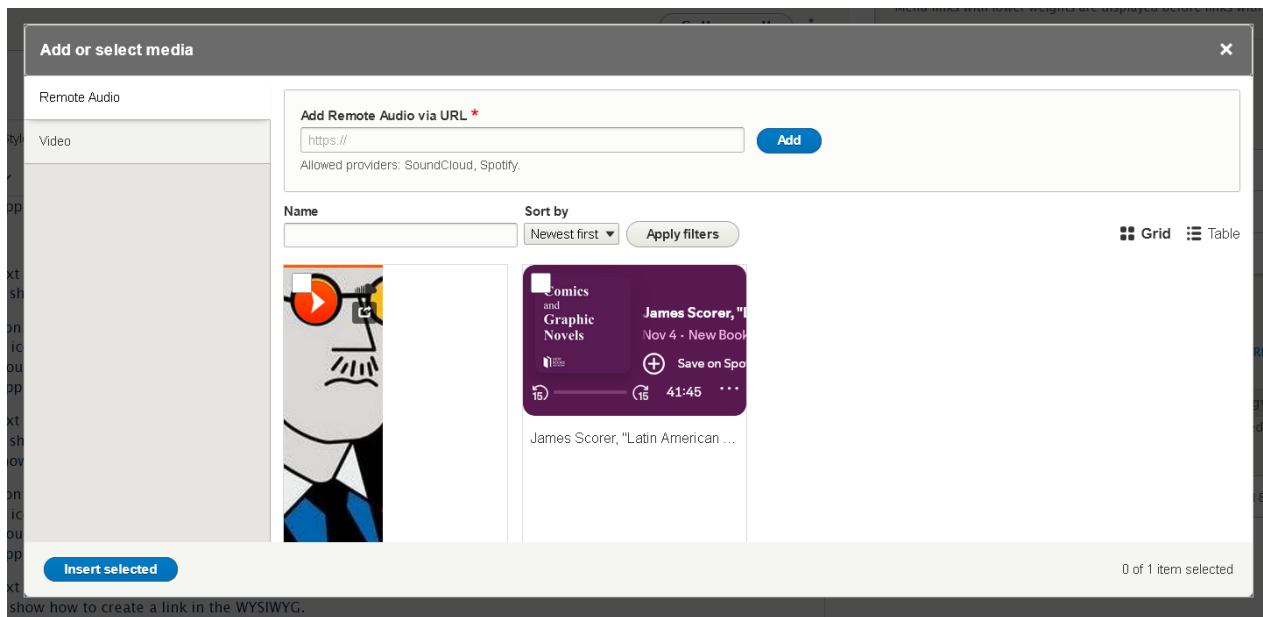

If you wish to embed a Panopto video, please see our [Embed Other Content Items](#) instructions.

To embed a video in the WYSIWYG via the Insert Media button, you would place your cursor where you want the video to appear and then click the Insert Media icon in the toolbar.

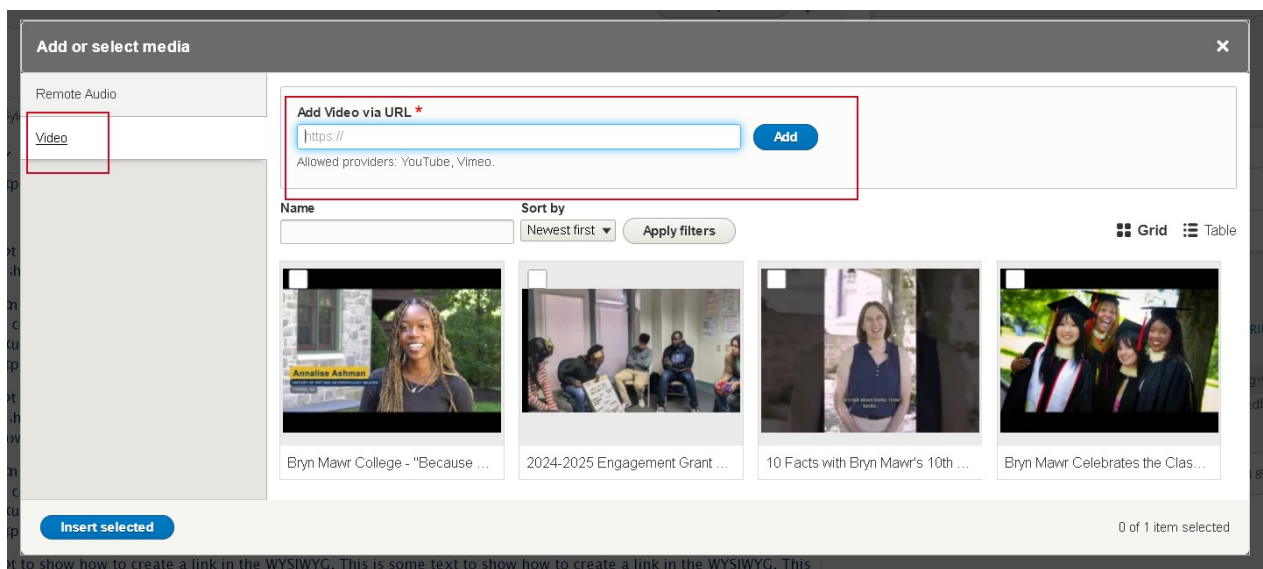

1. Place cursor on a new line where you want your video to appear
2. Press the Insert Media button in the toolbar

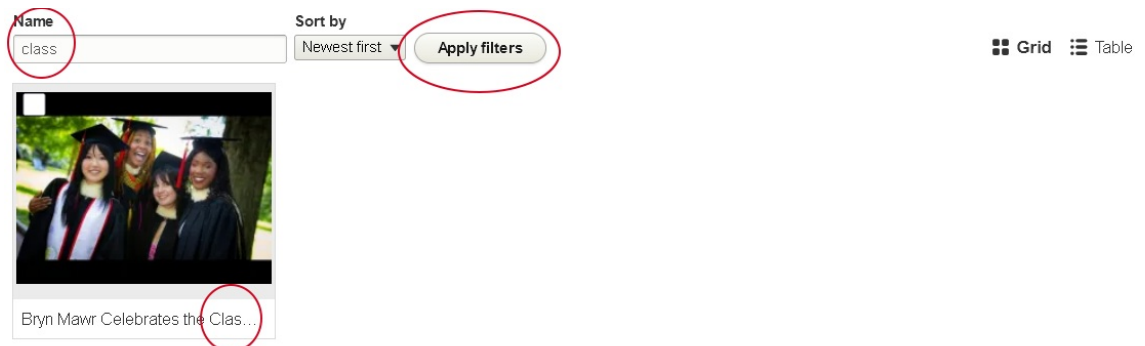

3. The Media Library modal window will open. The default is that the Remote Audio tab is selected upon opening the modal window.

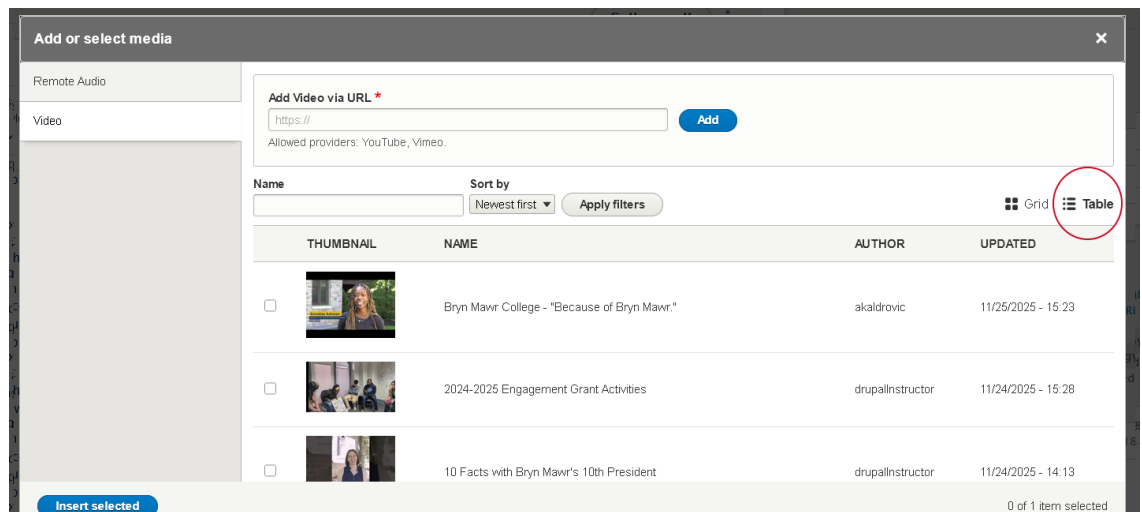

4. First select the **Vertical Tab** on the left for the type of media you are inserting. In this case it will be the "Video" tab

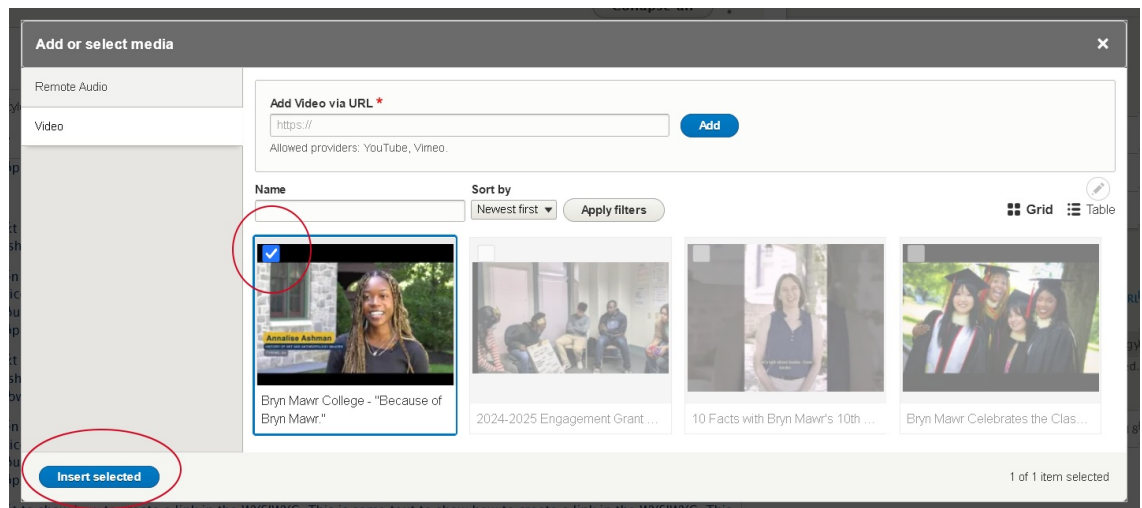

5. You can now choose to *Use an existing video* or *Add a new one to the library*
  1. Find an **Existing Video** in the library
    1. Using the Name filter, type a word you think the Name contains and press "Apply filters". This example will yield all the videos whose name contains "class", for instance. To clear the Name filter, simply delete the phrase you entered and then press "Apply filters" again.

2. You can also use the "Table" view by clicking the icon to the right of the filters, incase the Grid view isn't as helpful

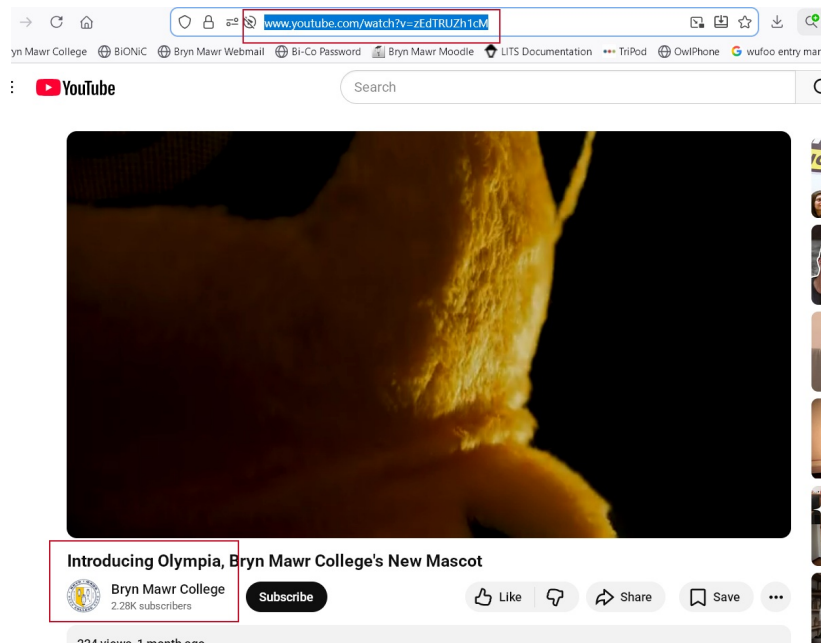

3. depending on the view (Grid or Table), click on the video or check the box next to the video you wish to insert
4. press the "Insert selected" button at the bottom of the modal window

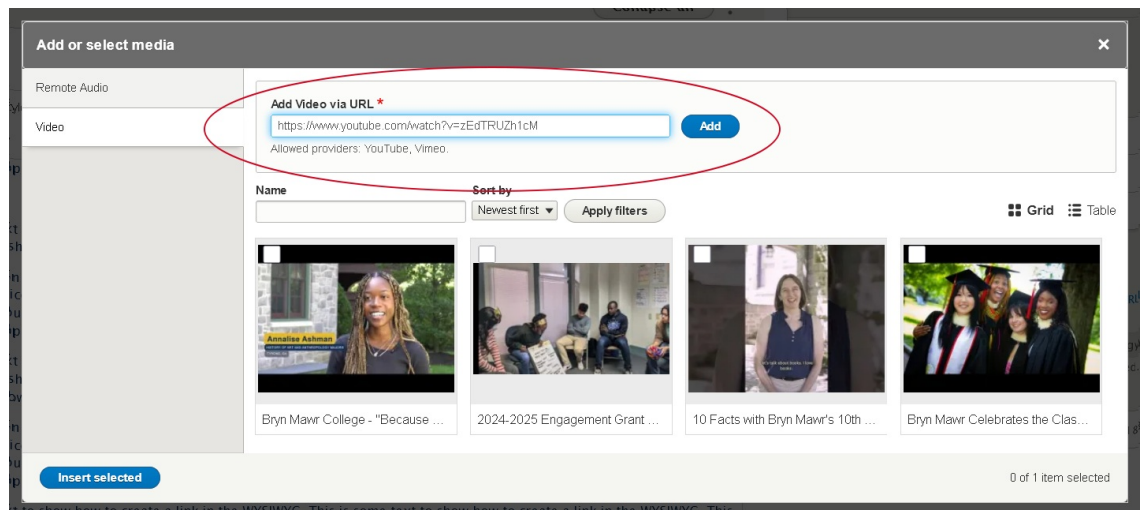

## 2. Add a New Video to the library

1. visit your video on the web. for example, we are going to the Bryn Mawr College YouTube

- channel and selecting a video to view.
- once there, you can simply copy the URL from the browser address bar

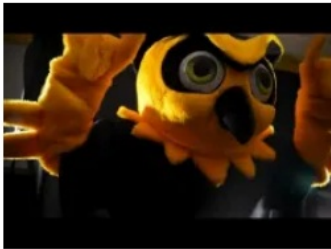

- then, simply paste that URL into the "Add Video via URL" field and click the blue "Add" button

- this will take you to a different modal window that lets you edit the Name field of the Video. This field is how you will find the video later in the library.
- once you are satisfied you can click the "Save" button

Add or select media

The media item has been created but has not yet been saved. Fill in any required fields and save to add it to the media library.

Name \*
Introducing Olympia, Bryn Mawr College's New Mascot

Save
0 of 1 item selected

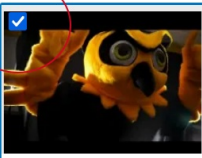

6. this takes you back to the library modal, where you can see that the video has a check mark on it. This means it is already selected.
7. If you are happy that is the video you wish to select, press the "Insert selected" button

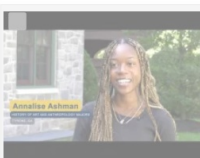

Add or select media

7. Similarly to an Image, you can use the "Insert Paragraph" before and after buttons that you see if you hover on the video in order to add content before or after the video

## Adding Audio in Drupal

Adding a Spotify or SoundCloud audio can be done by embedding directly in the WYSIWYG Editor by following the instructions below.

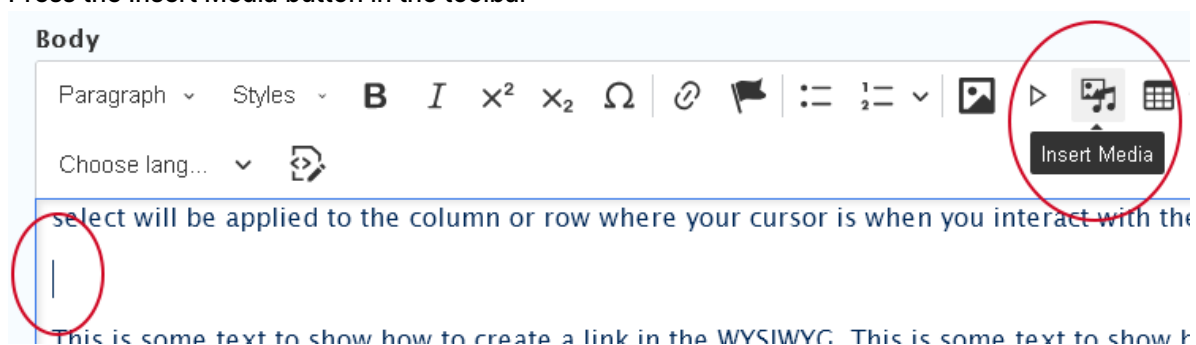

## Embed an Audio (Spotify or SoundCloud)

This feature is limited to only Spotify or SoundCloud audio tracks.

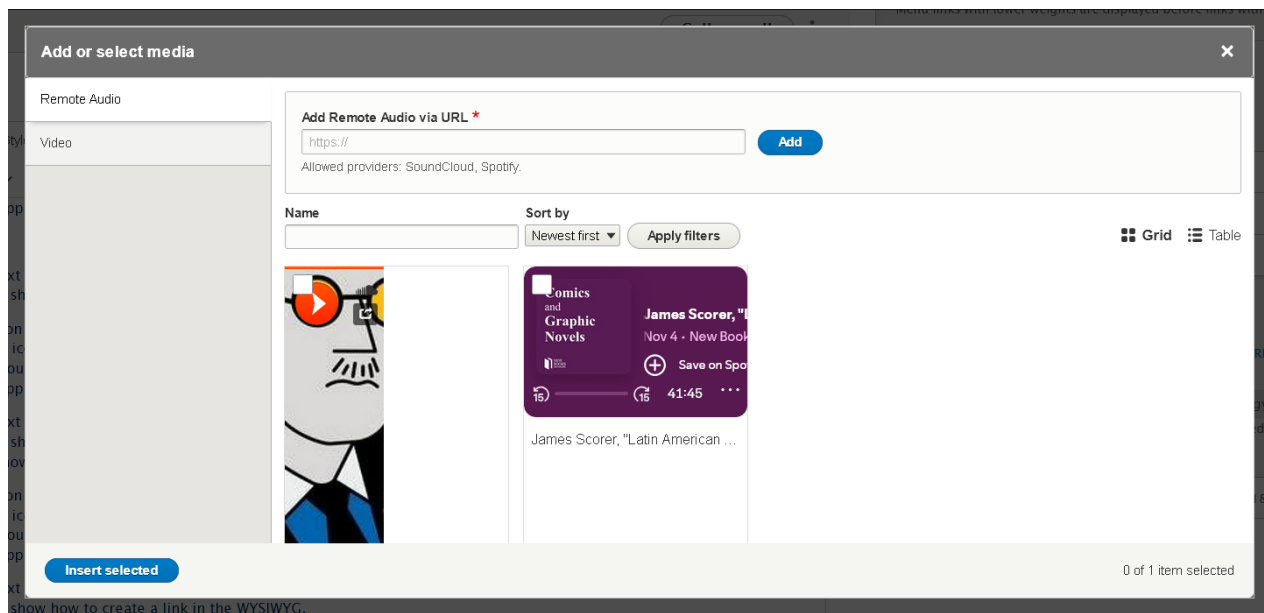

*What if my audio track, podcast or playlist can't also be found in Spotify or SoundCloud?* please see our [Embed Other Content Items](#) instructions.

To embed an audio in the WYSIWYG via the Insert Media button, you would place your cursor where you want the audio to appear and then click the Insert Media icon in the toolbar.

1. Place cursor on a new line where you want your audio to appear
2. Press the Insert Media button in the toolbar

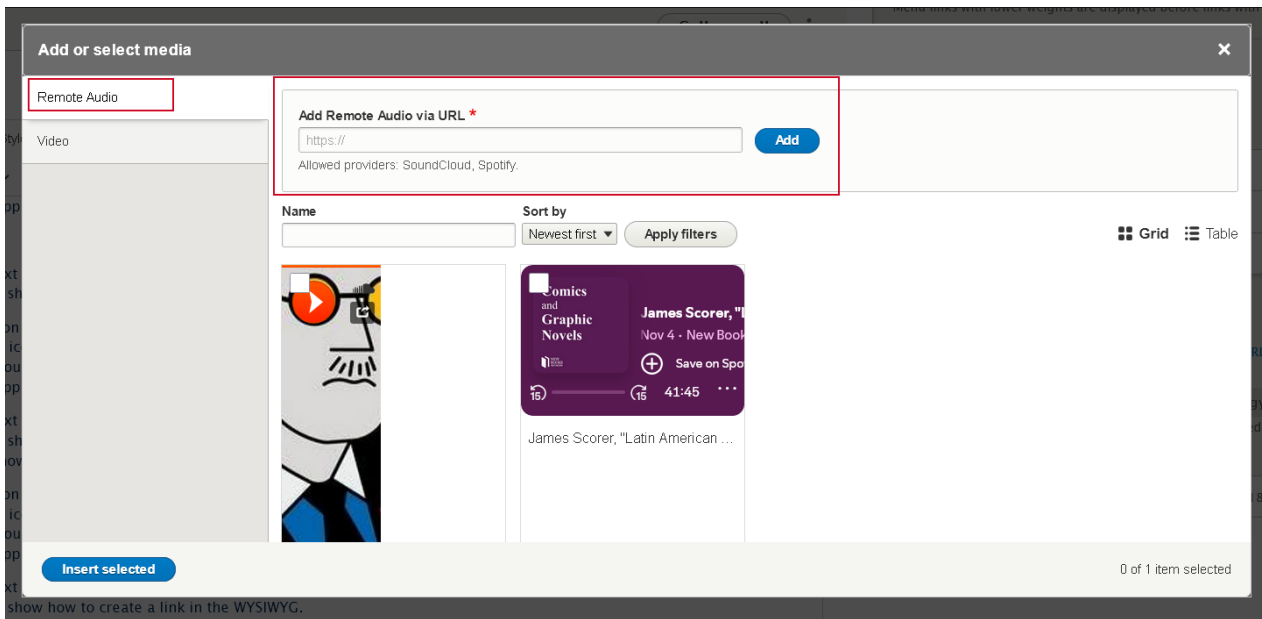

3. The Media Library modal window will open.

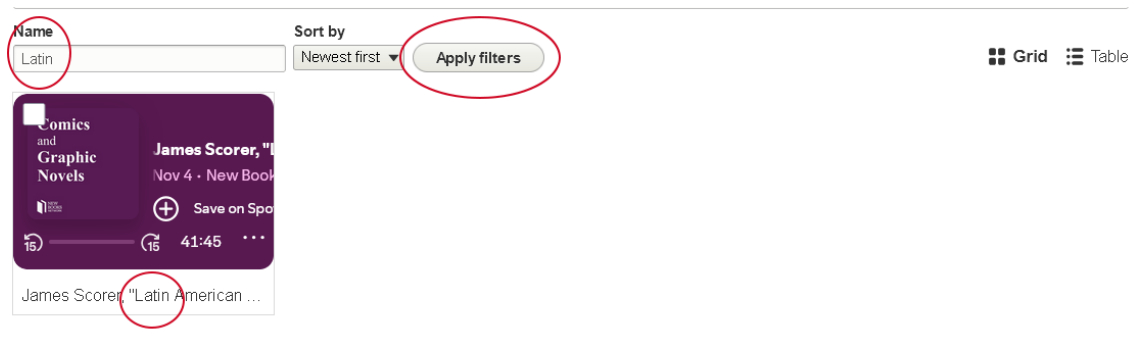

4. First select the **Vertical Tab** on the left for the type of media you are inserting. In this case it will be the "Audio" tab

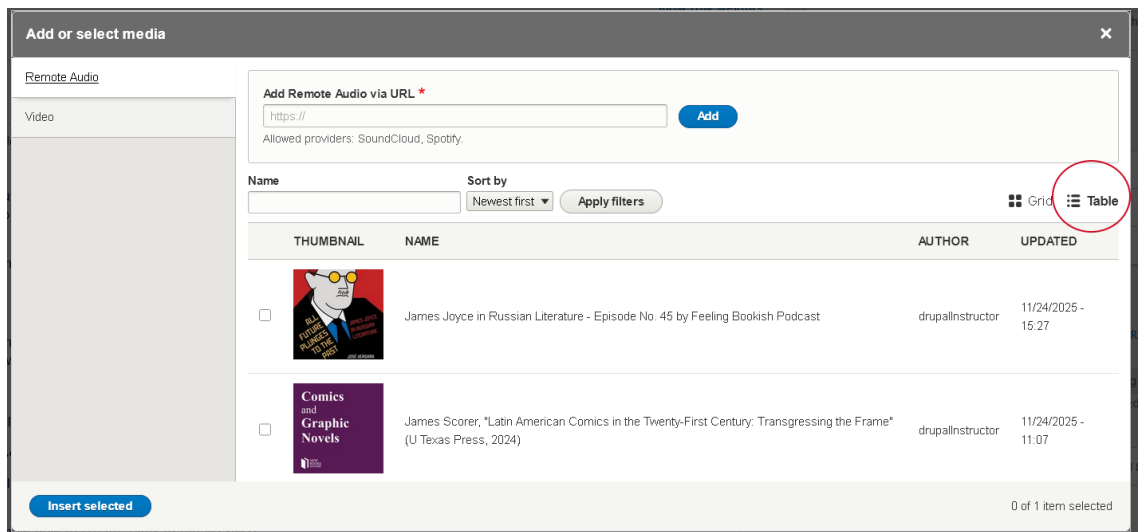

5. You can now choose to *Use an existing audio* or *Add a new one to the library*

1. Find an **Existing Audio** in the library

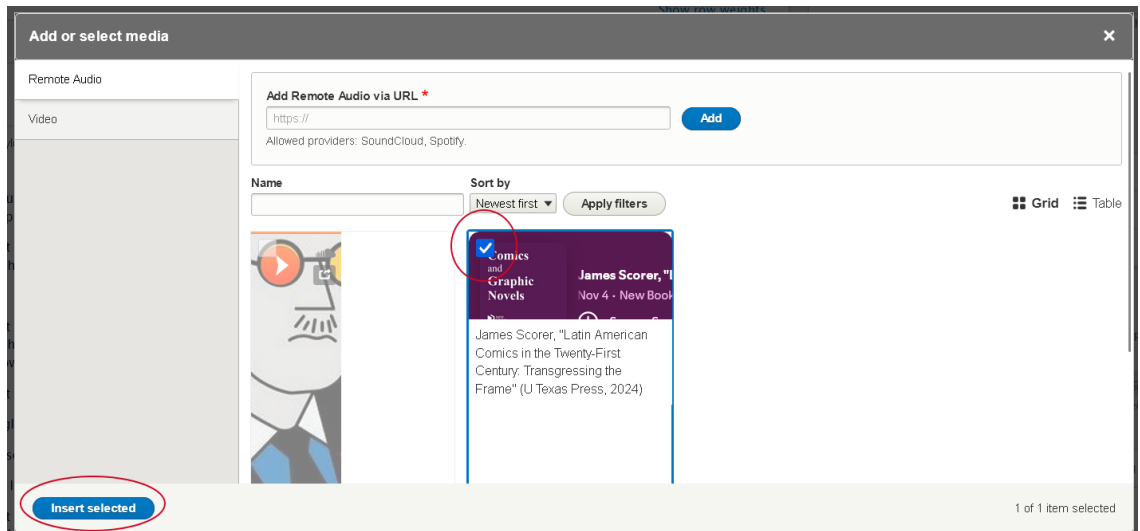

1. Using the Name filter, type what you think it is called and press "Apply filters"

2. You can also use the "Table" view by clicking the icon to the right of the filters, in case the Grid view isn't as helpful

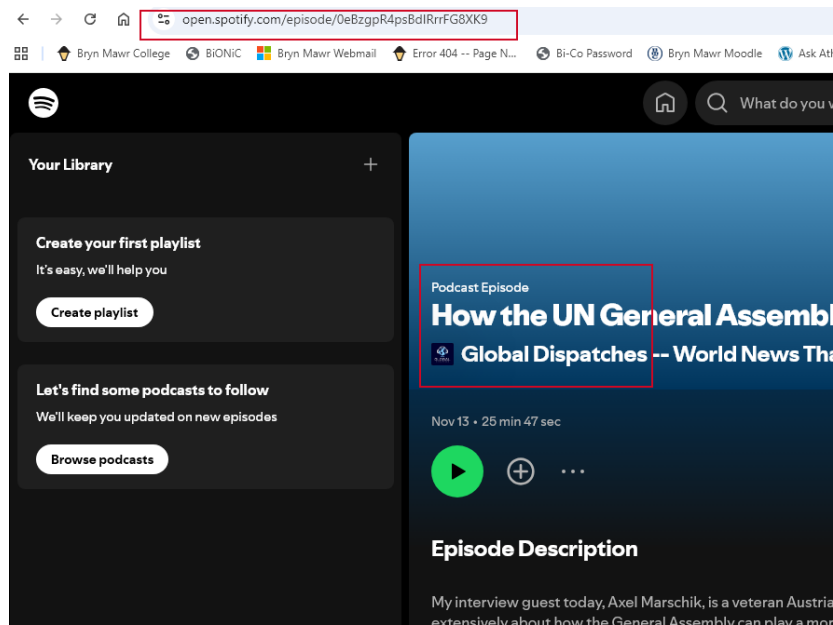

- depending on the view (Grid or Table), click on the audio or check the box next to the audio you wish to insert
- press the "Insert selected" button at the bottom of the modal window

## 2. Add a New Audio to the library

- visit your video on the web. for example, we are going to the Global Dispatches podcast on Spotify and selecting a track to use.
- once there, you can simply copy the URL from the browser address bar

3. then, simply paste that URL into the "Add Remote Audio via URL" field and click the blue "Add" button

4. this will take you to a different modal window that lets you edit the Name field of the Audio.  
This field is how you will find the audio later in the library.
5. once you are satisfied you can click the "Save" button

Add or select media

The media item has been created but has not yet been saved. Fill in any required fields and save to add it to the media library.

7. Similarly to an Image, you can use the "Insert Paragraph" before and after buttons that you see if you hover on the audio in order to add content before or after the audio.

Another option to display a video is to have it be part of the Feature Large and Feature Medium Flexible Content Items.

[Back to Top ^](#)

## Panopto

The only way to add video from other hosting providers, such as Panopto, is by adding it as an iframe via the Embed Flexible Content Item.

## Adding Video via Embed Flexible Content

**Note:** You must have the *Embed* role before proceeding.

*If you don't have the Embed role, please contact Communications for help with placing your video.*

If you have been granted **Embed permissions**, you may use these instructions to embed video.

If you don't have this permission but would like to request it, please reach out to [help@brynmawr.edu](mailto:help@brynmawr.edu) or [communications@brynmawr.edu](mailto:communications@brynmawr.edu) for assistance.

**Only embed content from known, trusted sites. Ask Web Services if you aren't sure.**

**Please use caution and get any code you don't fully understand vetted by Web Services before publishing on the website.**

The Embed Flexible Content Item should only be used for specific code-related embedding needs.

It is an extra level of permission. If you don't have that level of permission, you will see something like this:

FLEXIBLE CONTENT			Edit all	
+	WYSIWYG	Even the all-powerful Pointing has no control about the blind texts&nbsp;One day how.	Edit	
+	Carousel	2 Optional Carousel Heading, left, Test Slide one, This is the supertitle, Lanterns Glow.	Edit	
+	Embed	snazzy embed		

If you do have permission to use that Flexible Content Item, you would see a non-WYSIWYG text box appear. In this example, we will have pasted in the WuFoo embed code so a form will appear on the page.

First step is to copy the embed code from the source. Copy the embed code from Panopto (or other video hosting site).

In Panopto, there are a few options to check, if desired.

We care about the captions – so the **“Show Captions” box should be checked** as the default and viewers can turn them off if they need/choose.

Here's a link to the Panopto doc with a video tutorial and details on all of the options:

<https://support.panopto.com/s/article/Embed-a-Video>

Copy Embed Code

Screenshot example of getting iframe code from Panopto. NOTE: "Show Captions" is checked.

Edit the Drupal page you want to add the video to.

Locate the point in your text where you wish to embed the video. If it is in the middle of the WYSIWYG, you will have to add another WYSIWYG then cut the text that should follow the video from WYSIWYG pre-video and paste into the WYSIWYG that should be post-video.

## Can't find your Audio or Video?

Go to Content, select the Media tab and filter by *Type= Video* or *Type=Remote Audio* to see all available audio and videos to use in the WYSIWYG.

The Panopto videos you place in the Embed Flexible Content Items are unique to that embed instance and the page in which it is embedded.

If you want a single Panopto video to appear on multiple pages, please contact Communications to assist you with an In-Context block placement of that video.
