Flexible Content Items

In our first article about Flexible Content Items, we discussed a general overview of what Flexible Content Items are, how to use them and where to find them.

In this article we discuss how to create the following Flexible Content Items:

- People: List
- Social Media: Connect
- Feature: Large
- Feature: Medium
- Feature: Quote
- Image Detail: Large

People: List

This Flexible Content Item allows you to curate a list of people to make a department or lab people page. It works similarly to how you can select News Items where you can only make selections on one page, embed them and then select more from a different page of the people picker pop-up

	NAME	ADDED/UPDATED
☐	Carrie Young	Tue, 11/30/2021 – 18:54
☐	Elna Yadin	Tue, 11/30/2021 – 18:54
☐	Michael Winston	Tue, 11/30/2021 – 18:54
☐	Katheryn Whitcomb	Tue, 11/30/2021 – 18:54
☐	Abbey Wexler	Tue, 11/30/2021 – 18:54
☐	Adam B. Weinberger	Tue, 11/30/2021 – 18:54
☐	Maria Warnick	Tue, 11/30/2021 – 18:54
☐	Olivia E. Trotman	Tue, 11/30/2021 – 18:54
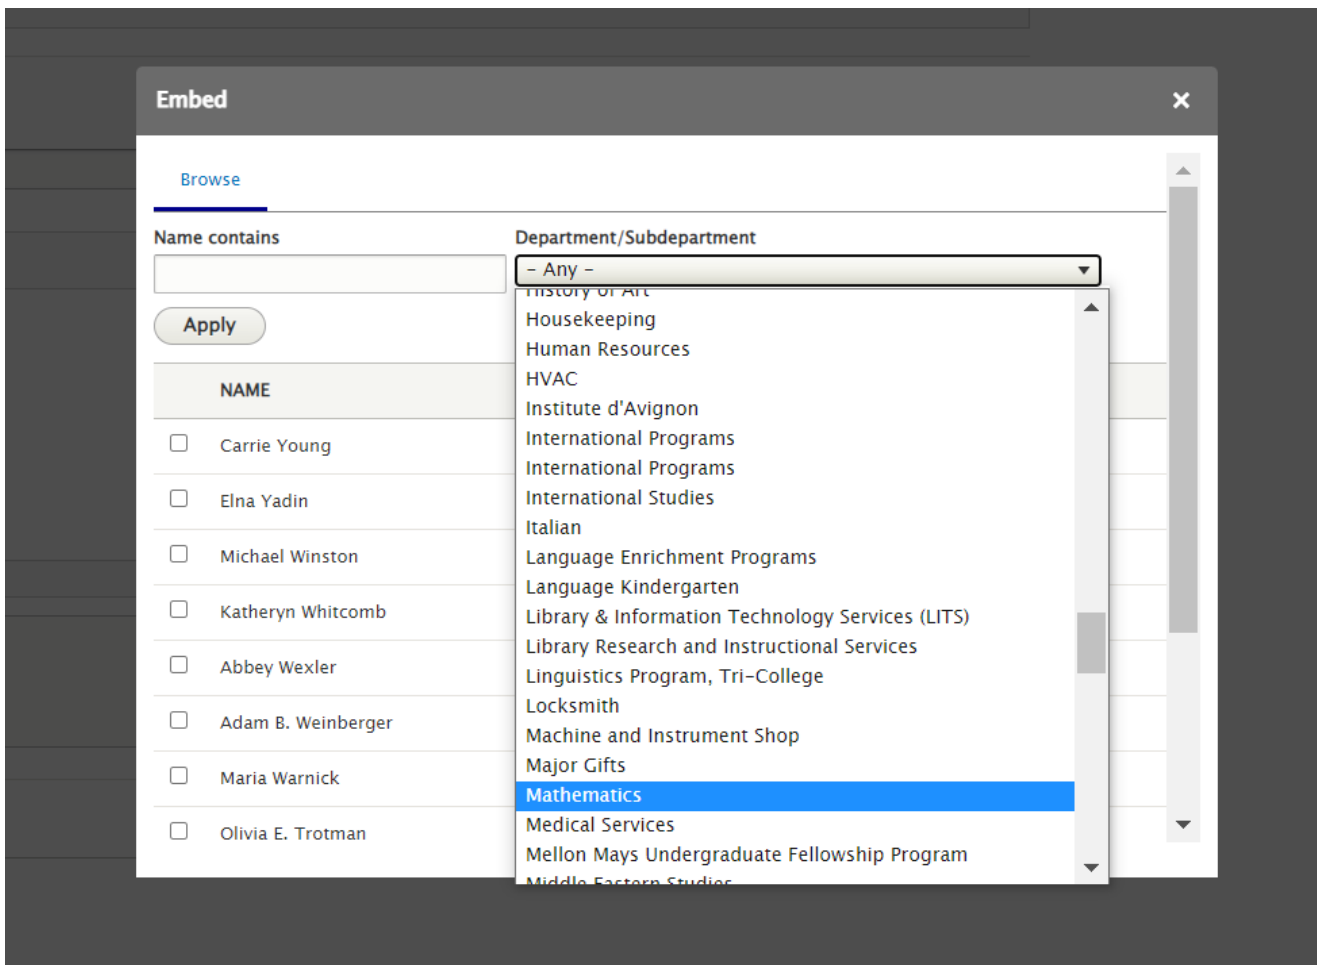

Just remember to hit Apply once you have put in your search criteria in the filters at the top

Once you have embedded people from one page of the picker, you will have to click Embed and then reapply the filters to find more folks on the next page of the picker for your search criteria

You can also drag and drop your selections to reorder folks

You can also use the Remove button to remove that person from the list you are creating. Note: This will only delete them from the listing. They will still appear on other departments' listings if applicable.

Social Media: Connect

This Flexible Content Item allows you to hand curate posts from various social media accounts.

The Handle is required so it can display on the image.

The background color is required if there is no image uploaded in the form to use as a background (used most often with Tweets).

The URL should be the full URL to your social feed for instance https://instagram.com/BrynMawrCollege

Feature: Medium

What is the difference between Feature: Large and Feature Medium?

- Feature: Medium is a more subtle way to feature content than the Feature: Large as it isn't a full-width display.
- Feature: Medium presents the image as smaller than in the Feature: Large
- Feature: Medium arranges the text and extras around that image differently than in Feature: Large.

This Flexible Content Item is a great way to draw attention to an important program or feature. This Feature Medium has only the quote, statistic, caption or link to a video overlaid on the image, if you choose to add one. It has a heading, image, image alignment option, intro field and space for up to three links.

Feature: Quote

This Flexible Content Item is a nice way to feature a photo, quote, and attribute (Name) to highlight something. No need to put quote marks around the quote.

Fill in the required fields and then press Save to see the Feature Quote on your page

Image Detail: Large

This Flexible Content Item is a great way to draw attention to an important program or feature. This Image Detail Large has the top of the text block slightly overlapping the bottom of the image. It has an image, title, intro field and space for up to three links.
