Immersive Reader is an assistive technology platform built into Microsoft programs with features such as text-to-speech, line focus and temporary text appearance changes that can make reading on screen easier.

- In most programs, click the View menu, then Immersive Reader to launch it.

- See Microsoft's Immersive Reader guide for each program for a complete list of features and how to use them:
  - Word
  - PowerPoint
  - Excel
  - Outlook
  - OneNote
  - Teams
