Panopto: Collect audiovisual assignments

Last Modified on 10/27/2025 3:00 pm EDT

Tags: Panopto

Panopto provides a few different methods for students to upload audio and video recordings as part of a class assignment or project. Each method has different pros and cons that you should consider.

Before You Start, you may need access to the following:

- a Bryn Mawr College Panopto account
- An Instructor of Record or Other Editing Teacher role in a Bryn Mawr Moodle course.

Method 1: Use an assignment folder in Panopto

An **Assignment** folder is a special type of subfolder in which students can create and upload recordings. As a result, it gives students an easy way to submit audio and video recordings. These recordings can either be made directly in Panopto or created and edited with other tools first before being uploaded to Panopto.

Method 2: Give students creator access to a Panopto course folder

Anyone with a Teacher role in Moodle can give students "Creator access" to a Panopto course folder. This allows students to directly upload recordings into the course folder.

Method 3: Allowing students to submit a Panopto file to an Assignment in Moodle

As a Teacher, you can create an Assignment in Moodle to which students can submit links to their Panopto recordings.

Method 4: Create a Panopto Student Submission Activity

Moodle has a special type of activity, Panopto Student Submission, which allows students to directly submit their work to an assignment folder.
