Moodle: Hide and unhide courses and course sections

Last Modified on 01/10/2025 10:03 am EST

Moodle lets Instructors of record and Other editing teachers hide an entire course site to prevent **students, auditors and guests from seeing it.** Similarly, Moodle allows course instructors to hide course sections, assignments, and materials.

> **Before you start**, you need:
>
> - an **Instructor of record** or **Other editing teacher role** in a Bryn Mawr Moodle course

Hide/show entire course

Hide/show course elements

Manually

Manually hide course sections, activities or resources that you don't wish students and guests to see. (Instructors of record, Other editing teachers, Non-editing teachers will still see them, but with a **Hidden from students** tag attached.)

Automatically, at a specified time

Add date restrictions **to hide or reveal a course section, activity or resource to students and guests at a future date and time**. The item remains visible to Instructors of record, Other editing teachers, and Non-editing teachers with a **Restricted** tag that summarizes the restriction parameters. (Students and guests do not see this tag when the item is visible to them.)
