Macmillan (Achieve, LaunchPad): Link to Moodle

Last Modified on 12/12/2023 3:24 pm EST
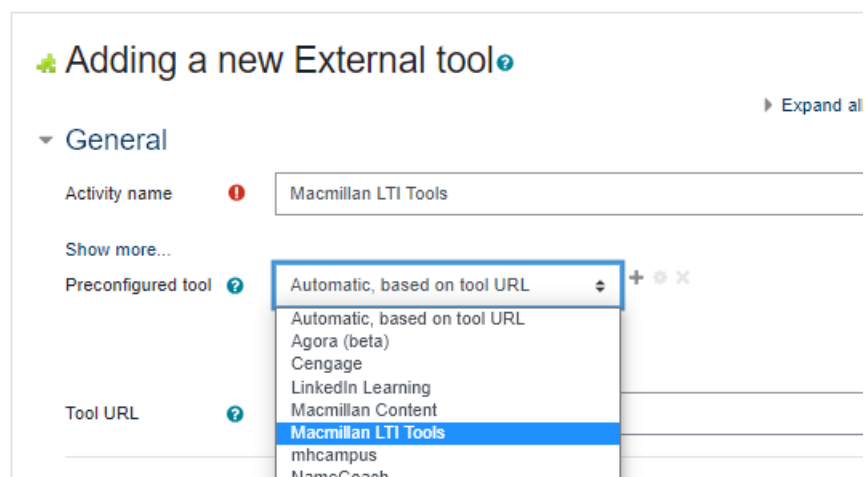

> **Before you start**, you will need:
>
> - an **Instructor of record** or **Other editing teacher** role in a Moodle course
> - an **Instructor account** for the Macmillan tool you want to use
> - to **set up your "course"** within the Macmillan tool you want to use

Moodle features an integration that lets instructors use **Macmillan's learning platforms** (e.g., **Achieve** or **LauchPad)** as part of their course.

Add a Macmillan activity

1. Open your Moodle course and click **Turn editing on** (if it isn't on already)
2. Click **+ Add an activity or resource**
3. Click the **Activities** tab, then click **External tool.**
4. Enter an **Activity name,** then choose **Macmillan LTI Tools** from the **Preconfigured tool** menu as shown below.

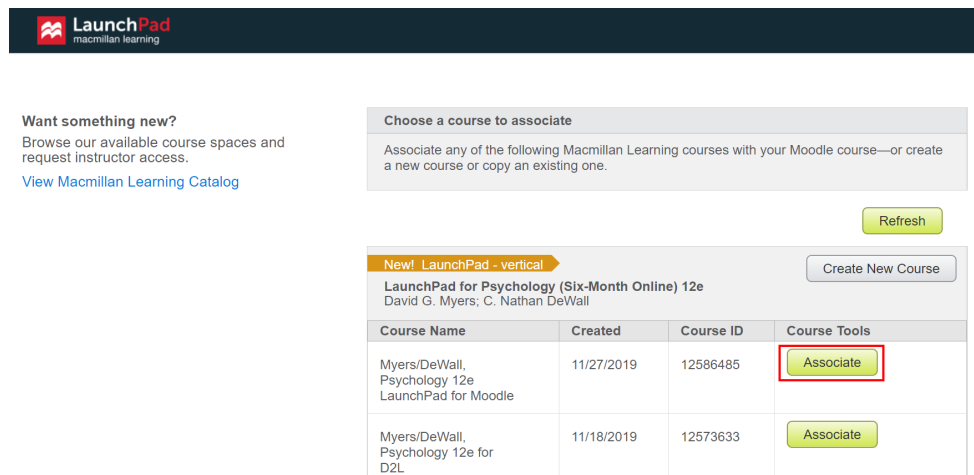

5. Click **Save and Display** at the bottom of the screen to create the activity and launch it.

Connect with a Macmillan Class

1. In the **Course Tools** menu select the **Connect with ...** option that matches the Macmillan tool you want to use.

> **Is your product missing?** Please contact the Help Desk to request that we add it to Moodle.

2. **Sign in using the name and email address you used to create your Macmillan instructor account** , if you aren't signed into it automatically.
3. **Find the Macmillan course** you want to connect with and click **Associate**.

> **Not seeing your course?** See Macmillan's troubleshooting suggestions .

4. Verify you made the right selection and click **Yes, Associate This Course**.
5. You'll see a **Success!** message when the connection is made. Click **OK** to close this window.

You should now see a set of **instructor course troubleshooting and support tools** (Diagnostics, Roster Information, etc.) in the content window. **Please note:** students see **different** tools for troubleshooting their own accounts and getting technical support when they open this activity.

Additional Support

See Macmillan's **instructor and student guides for your product** on the **Macmillan Learning Support site** for detailed information on how to use it and avenues for further support. Although LITS can help you with Moodle's Macmillan integration, we do not administer Macmillan platforms and can't provide support for them.

Note: For **Macmillan's Moodle-related articles**, be sure you are reading the **deep integration** versions. Some information in the "basic integration" guides will not apply to the connection you make.
