Drupal Short Session: Image-based Features in Flex Content

WATCH THE VIDEO! If you are a visual learner, or simply prefer learning from a video, please watch the video on our Drupal Training Videos page 🔗

What are these Image-based Features and why do I care?

Image-based Features refer to Four different Flex Content Items that highlight content, provide in-page navigation and add visual interest to a page

Our Feature Medium, Feature Large, Feature Quote and Image Detail Large all help visitors to briefly learn about a topic as well as explore it in-depth. By using CTAs that are built into most of these Flex Content Items, we can provide direct links to the topic pages that the visitor may take longer to find on their own.

These Image-based Features make content easy to consume, scan and explore.

How can these Help My Page?

Our Feature Medium, Feature Large and Image Detail Large all can spotlight a specific topic in a brief way. They all use optional embellishments of either a quote, statistic or a caption to enhance the required image. These types of flex content items encourage the visitor to explore more on the topic with the use of up to three optional CTAs. The Feature Large has an additional area of CTAs in a Dropdown where you can choose to add up to five additional links on the topic you are spotlighting.

The Image Detail Large is the only that has an extra WYSIWYG body field to add additional information, whereas the Feature Large is the only one that has the extra Dropdown area where you can add up to 5 additional links.

Our simplest one is the Feature Quote, which is *a simple, non-syndicated quote*. It consists of an image, a quote and its source.

Simply put, These Image-based Features all can be used to elevate your page's content in the following ways:

- Add visual interest

- Split up sections of a page

- Bring focus to important information

To see how These Image-based Features or any flex item looks, please visit/node/53216 ⧉ which is our All Content page. Our All Content page is useful to see how any item we showcase in these videos will look on your typical department page.

Image-Based Features and their elements

All the Image-based Features we mention here are listed in Column One of the chart below. They all share certain fields in common, which are listed on Row One of the chart below. The "x" in each column represents which Image-based Feature uses what field. As you can see, they are all pretty similar. The Dropdown field allows you to add up to five (5) additional CTAs. The Item Block field allows you to choose to add one enhancement from the following list: Quote, Statistic, Caption or Video (which is part of our Remote Video library. Find more info on that in our Video article ⧉.) The Image Align field is important only if you are using the Feature Medium on the Marketing theme. It can stay as the default for any Inside theme page.

	Heading (or Name)	Image	Image Align	Intro (or Quote)	Body	CTA	Dropdown	Item Block
Feature Large	X	X		X		X	X	X
Feature Medium	X	X	X	X		X		X
Image Detail Large	X	X		X	X	X		X
Feature Quote	X	X		X				

Feature: Large

This Flexible Content Item is a great way to draw attention to an important program or feature. This Feature Large has all the pieces overlaid on the image. It has an image, heading, intro field and space for up to three

links as well as an additional dropdown of links (Feature Child: Dropdown)

You can also have a quote (*Feature Child: Quote*), statistic (*Feature Child: Statistic*), caption (*Feature Child: Special Caption*) or link to a video (*Feature Child: Video*) displayed prominently.

Adding a New Video

If we click the Add New tab we will see a form to fill out to add the video item to the library.

Only fill in the required fields.

The Name field and URL field are required. It is important to name your video clearly, but succinctly.

The Cover Image can be ignored as no image appears when you select it for any of the Feature Child videos.

The next field that you will need to fill in is the URL field. This is the address of the YouTube or Vimeo video.

Scrolling down, you will see that the rest of the fields have defaults that can be left.

Press the Save & Embed button.

Name *

Title *

Introducing our new mascot
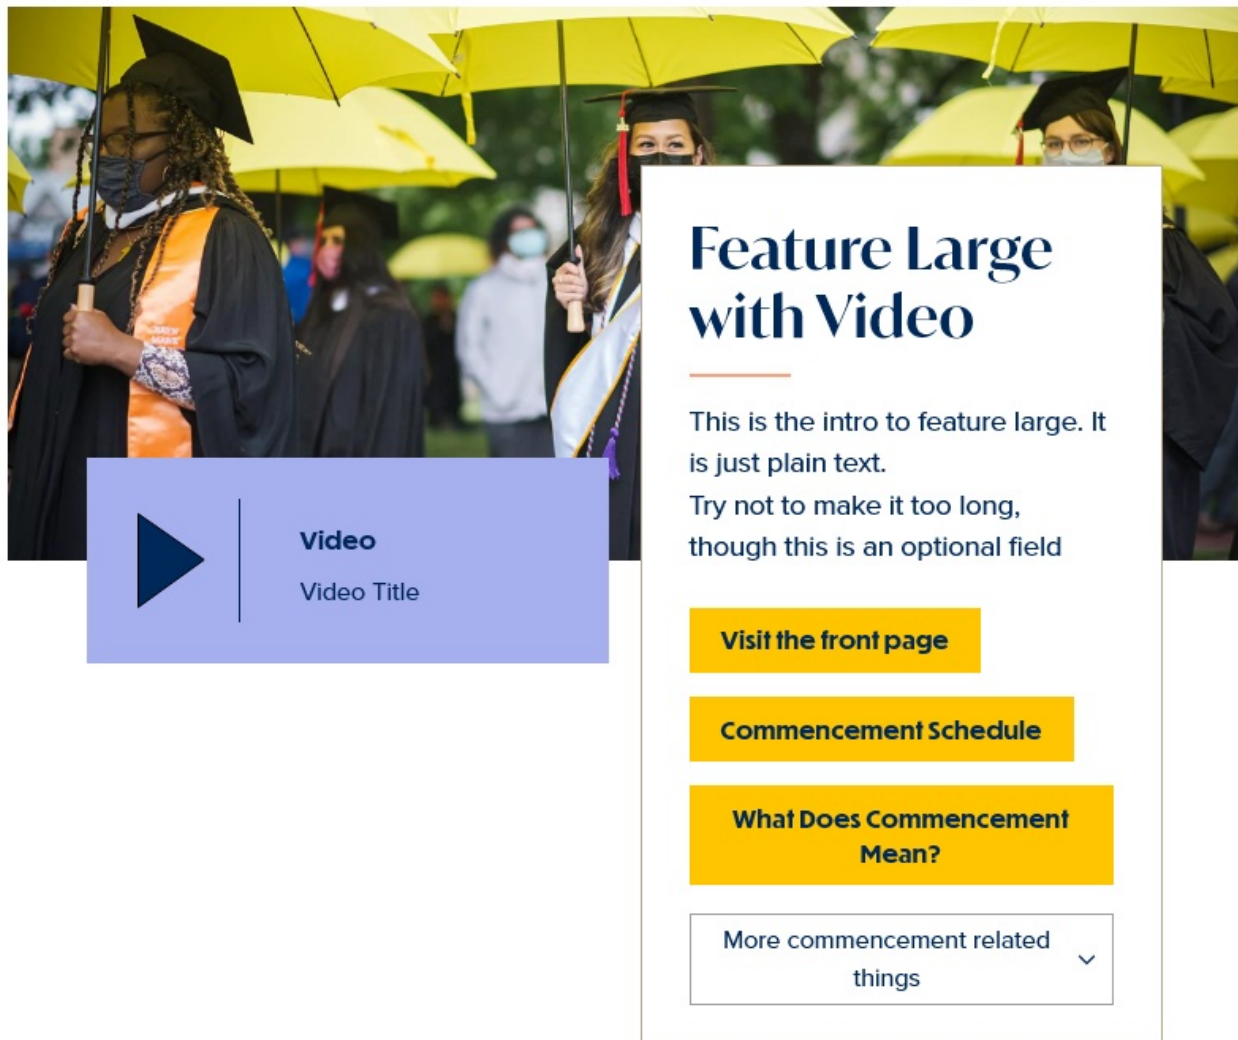

Clicking on the "Remove" button will remove the Remote Video from our Feature Child Video.

Clicking on the Edit button will open a modal window with the video edit screen. Only do this with a new video you have *just added* to the Remote Video library.

This is what it looks like to add a Feature Child Video

Feature: Medium

What is the difference between Feature: Large and Feature Medium?

- Feature: Medium is a more subtle way to feature content than the Feature: Large as it isn't a full-width display.
- Feature: Medium presents the image as smaller than in the Feature: Large
- Feature: Medium arranges the text and extras around that image differently than in Feature: Large.

This Flexible Content Item is a great way to draw attention to an important program or feature. This Feature Medium has only the quote, statistic, caption or link to a video overlaid on the image, if you choose to add one. It has a heading, image, image alignment option, intro field and space for up to three links.
