Recommendations

For individuals

For Teams and groups

Cloud storage

Microsoft Teams

Warning: This functionality requires a Team. See Microsoft Teams: Overview for how to request one.

Files stored in a Team can be accessed via the following methods.

- Microsoft Teams desktop application
- Microsoft Teams mobile app
- Outlook desktop application
- Webmail

File access is **automatically granted to Team members**, who *you can* add or remove. This makes it an **ideal**, **centralized location** for a team/group's shared files. Learn more in Microsoft Teams: File storage and sharing.

Network drives

Warning: Access restrictions

- Off-campus access requires the VPN.
- You cannot access network drives from a mobile device.

This PC	× +
$\leftarrow \rightarrow \land \Box$	□ > This PC >
⊕ New ~ 🔏 [□	Î ▲ A <pa <="" p=""> A A A A A A</pa>
 Desktop Downloads Documents Creative Cloud Files This PC Windows (C:) 	 Devices and drives Windows (C:) 94.2 GB free of 237 GB Network locations Storage (S:) (\home.brynmawr.edu\hom 2.99 TB free of 14.9 TB
> 💼 (\\home.brynma > 💼 Storage (S:)	awr.edu\home) (H:)

Files stored on a network drive must be accessed by mapping the drive to each computer you use.

Home drive (H:)

File access is limited to you and only you. Thus, files must be shared using a different storage solution.

Shared drives (S:, P:, etc.)

File access is controlled by Systems-level permissions, which must be requested through the Help Desk. This allows **multiple individuals to have access** to the same shared location. Sharing one-on-one is not possible.

OneDrive

Files stored on OneDrive can be accessed via the following methods.

- OneDrive desktop application
- OneDrive mobile app
- Webmail

File access is **controlled by the file owner** (a.k.a. whoever created the file). Files can be shared**one-to-one** or **one-to-many**, making it an ideal location for day-to-day file storage and one-off sharing with a specific subset of people.

Local storage

What is local storage? "Local" storage refers to any location on a physical device such as the Desktop, Documents, and Downloads folders on your computer.

LITS highly recommends relying on a form of cloud storage to ensure you'll **never lose valuable files** in the event of a device failure. Local storage **should only be used temporarily**. There is no way to share files from local storage.

Questions?

If you have any additional questions or problems, don't hesitate to reach out to the Help Desk!
