

Adobe Firefly

Last Modified on 09/24/2025 1:53 pm EDT

This article outlines how to **access and use** Adobe Firefly.

Before you start, you will need the following:

- an [Adobe ID](#)

What is Adobe Firefly?

Adobe Firefly is a generative AI tool used to **create and edit images, audio, and video** using text prompts. It is available as a web application and within Adobe Photoshop and Illustrator.

Appropriate use

Your use of Adobe Firefly is governed by [College policies](#) and Adobe's terms of service.

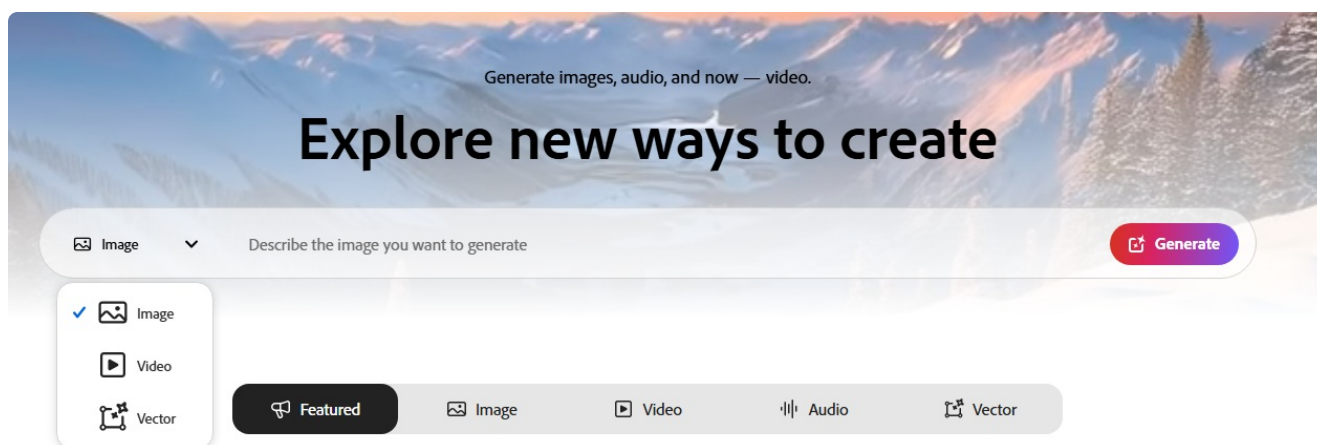

Warning: You are prohibited from using the following content, per [Adobe's Acceptable Use Policy](#).

- Copyrighted material you don't own
- Sensitive data

 Adobe reserves the right to **monitor content you generate** for abuse of this policy. 

- Content you generate [will not be used](#) to train Adobe's generative AI models, except where you request it
- [Per Adobe's terms of service](#), you are only indemnified against claims of copyright infringement if you do not violate their **Acceptable Use Policy** concerning copyrighted materials.

Accessing Firefly

Firefly is accessible as a web application or within Photoshop and Illustrator. To access Firefly online:

1. Open **Google Chrome**
2. Navigate to the [Adobe Firefly website](#)
3. Login, using the following account
 - **Students:** [free Adobe ID](#)
 - **Faculty & Staff:** College email and password

Using Firefly

Attention: Our license provides each user with [1000 generative credits per month](#), which are used across all Adobe applications. Every time you generate content, **1 credit is deducted** from your monthly allowance.

Online

Once you've logged into Firefly's website, you can enter a prompt to **generate** or **refine** an image or video. Once finished, you can also **export** these files.

Generate

1. To the left of the text box, select **what type of design** you want to generate
 - **Image:** [raster or pixel-based image](#), such as from Photoshop
 - **Vector:** [vector or shape-based image](#), such as from Illustrator
 - **Video**
2. **Type a description** of the content you want to generate

Tip: The more detailed and specific your description, the better the result will be.
[See Adobe's guide on effective prompts](#).

3. Click **Generate**
4. All generations will be saved on **Home > Files**

Refine

- Type additional descriptions
- Upload reference images for **Composition** or **Style**
- Adjust any of the following parameters
 - **Aspect ratio**
 - **Visual intensity**
 - **Color and tone**
 - **Lighting**
 - **Camera angle**

Export

Hover your mouse over your generation to see additional options.

- **Edit**
- **Open** in an Adobe application
- **Download** to your computer

In Photoshop

Adobe is incorporating Firefly-enabled features into Photoshop. See below for examples of how to use [Firefly in Photoshop](#).

- [Generate Image](#): create a pixel-based image
- [Generate Background](#): replace the background of your image
- [Generative Expand](#): fill space created when you enlarge the canvas size
- [Generative Fill](#): generate elements to place in a portion of an image

In Illustrator

Adobe is incorporating Firefly-enabled features into Illustrator. See below for examples of how to use [Firefly in Illustrator](#).

- [Generate Vectors](#): create vector graphics

- [Generate Pattern](#) : create patterns to fill shapes
- [Generate Shape Fill](#) : generate graphics to fill a vector shape
- [Generative Expand](#) : fill space created when you enlarge artwork
- [Generative Recolor](#) : change colors
